Create a New Program – Selecting Program Templates

1) The first step in creating a new program is selecting which template you wish to model your program around. The templates will outline which options and screens you will have access to for the program, and other basic information about the program. Administrators can create new templates by going to the Program Wizard in the Settings Control Panel.

Once you have selected a template for your program, click on either the Program Name or Description. A pop-up window will then appear saying "Okay to create a <program name you chose> program? Click on the "Okay" button to continue. Not all the pages shown in this documentation will be available to you, depending on which template you have chosen, and what options administrators have made available through templates. Administrators can set values for the following:

Basic Information

- Duration (minimum and maximum)
- Volume (minimum and maximum)
- Permitting retroactive programs
- Permitting advanced spending

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Administrators can choose to include or not include the following:

Basic Information

- Distributors
- Operators
- Brokers

Rate Types available:

- Per Pound
- Per Case

Discount Types available:

- Fixed Price
- Rebates
- Lump Sums
- Growth
- Formula Pricing

Claim Mechanics:

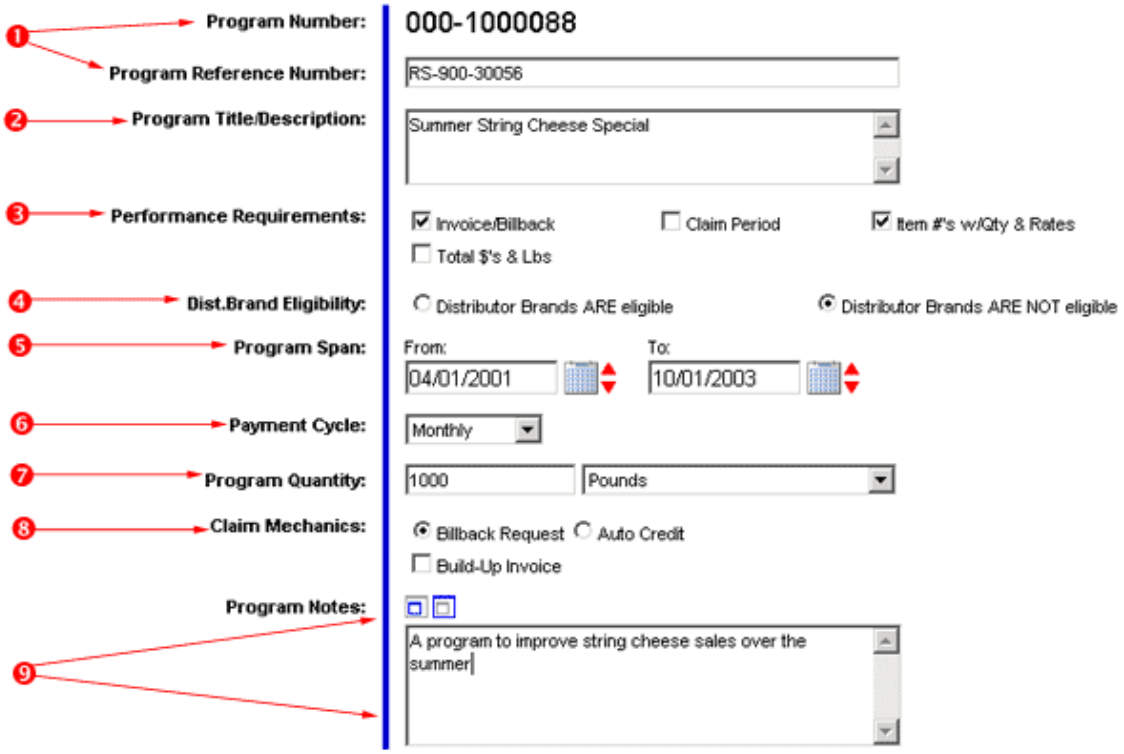

- Off-invoice
- Billback Request
- Auto payment
- Auto credit

Payment Cycle:

- Daily
- Weekly
- Monthly
- Quarterly
- Semi-Annual
- Annual

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Basic Information

You MUST click the continue button to be able to enter the remainder of the program's contents

1) Program Number and Program Reference Number: A program number for the program you are creating will be automatically generated. This number will be used to refer to this program to edit or delete the program. In addition to the automatically generated program number, you can enter a program reference number that connects this program to another system you use.

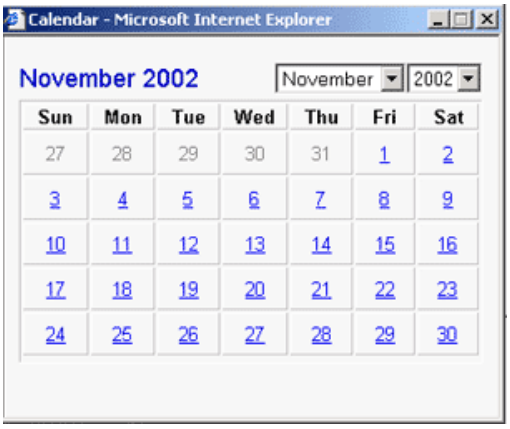

2) Program Title/Description: To help you identify your program, you can enter a description of the program you are creating. This is a required field.

3) Performance Requirements: Select the documentation that will be required from the distributor to receive the program benefits. The options are: Invoice/Billback, Claim Period, Item # with Quantity & Rates and Total $'s and pounds. The options available to you are controlled by the template, so if you do not see the option you need to select, choose another template.

4) Distributor Brand Eligibility: Select whether or not distributor brands will be eligible for this program.

5) Program Span: Select the period that this program will run from. You can either enter the date in the box or click on the calendar icon to the right of the box. Clicking on the calendar icon will show you the following screen [next page].

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Pull down the month and year you wish to select, then click on the day. The window will close once you have clicked on the day, and the information you have selected will be entered into the boxes. You can also use the up and down arrows to the right of the calendar icon to increase or decrease the date you have entered by one day. You must enter a program span.

6) Payment Cycle: Select how frequently payment for this program will occur. Options are: Daily, Weekly, Monthly, Quarterly, Semi-Annual, and Annual. The type of program you have selected controls these options. If you do not see the option you need, select a different type of program.

7) Program Quantity: Enter the number and type of units in the program. Program types include per pound and per case. You must enter a program quantity.

8) Claim Mechanics: Select how distributors should claim their program benefits. Options include: Off Invoice, Billback Request, Auto Payment and Auto Credit. The program type controls these options. In addition to selecting one from that list, you can also select whether or not to have a Build-Up Invoice by checking on the box next to it. If you do not see the option you need, select a different program type.

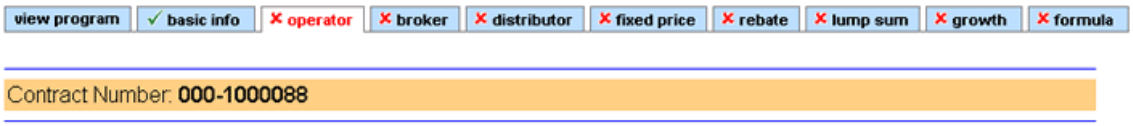

9) Program Notes: Enter any notes or comments about the program here. You can make the note area size larger or smaller by clicking on the two icons above the notes area. This is a required field.

When you click on "Continue" a box will appear and say "Press OK if all program information is correct". Click "OK" to continue. At this point, the program has been created and saved. Although you need to continue adding information to the program, you can do so at a later time if you wish by reviewing the program in the "Work in Progress" area.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Navigation

At this point, there are a number of navigational elements that appear. The first is a list of the pages available to help you set up your program.

Possible navigation elements are:

- View Program – allows you to review information about the program you are creating
- Basic Info – basic information about your program such as it's name, number, duration, payment and volume.
- Operator – allows you to specify operators for the program
- Broker – specifies brokers in the program, as well as weights for the brokers
- Distributor – specifies distributors in the program
- Fixed Price – allows you to establish a fixed price program
- Rebate – establish a rebate program
- Lump Sum – create lump sum component
- Growth – this allows you to build a single or multi-step growth program
- Formula – the formula lets you create pricing periods and rules for your program

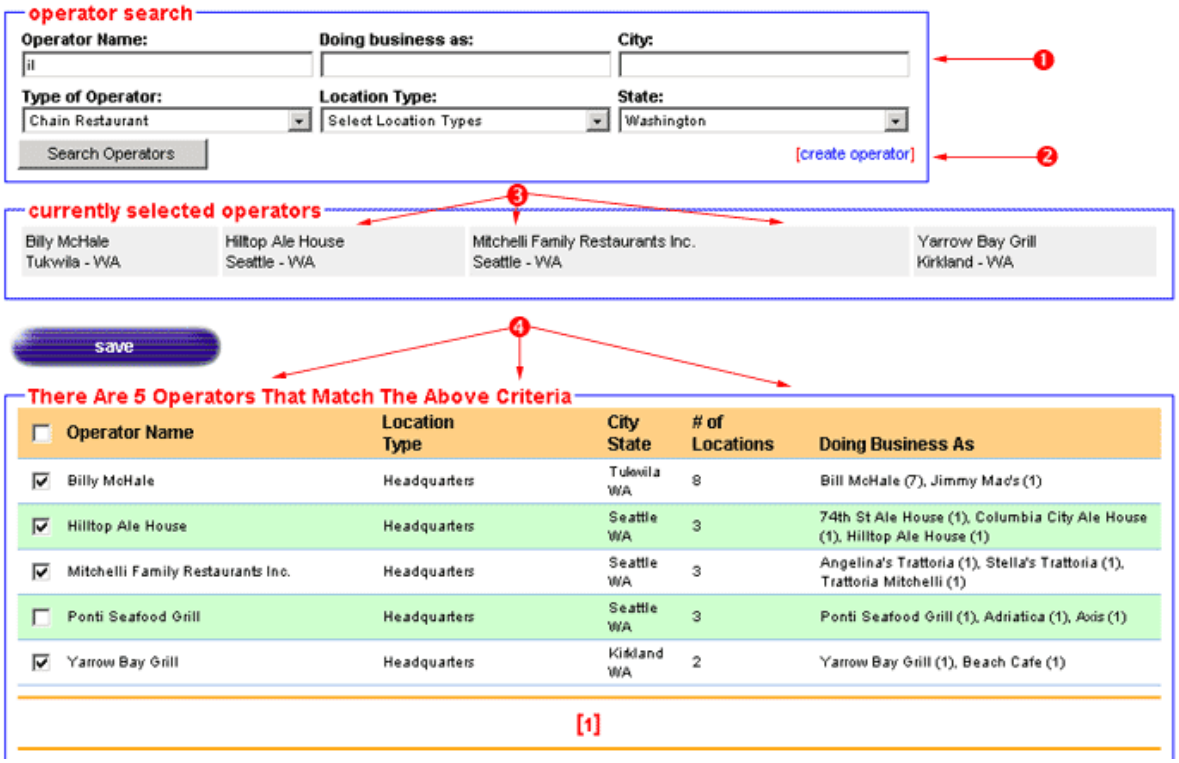

The elements you will have access to depend upon the program type you selected. If you do not see an option you need, select a different program type. You can view or edit information from any screen at any point. Additionally, the contract number for the program you are editing is displayed at the top of every screen. You will also see a lock image.

The program is locked while you are editing it so that no one else can make edits at the same time. If you choose to unlock the program, you can view the information you have entered, but you cannot change any of it. In order to make changes, the program must be locked.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Selecting an Operator

1) The search function allows you to find an operator or operators you wish to add to your program. You can search for an operator by their name, the name they do business as, the city they operate in, the type of operation they run, the location type, and their state of business. Clicking on "Search Operators" will return a list of operators that you can review. The more areas of information you provide, the fewer results will be returned. For example, at this writing if you only select the State of Washington, 269 operators are returned. If you select a "Non-traditional Operator" as an operator type in addition to selecting the State of Washington, only 4 operators will match your criteria.

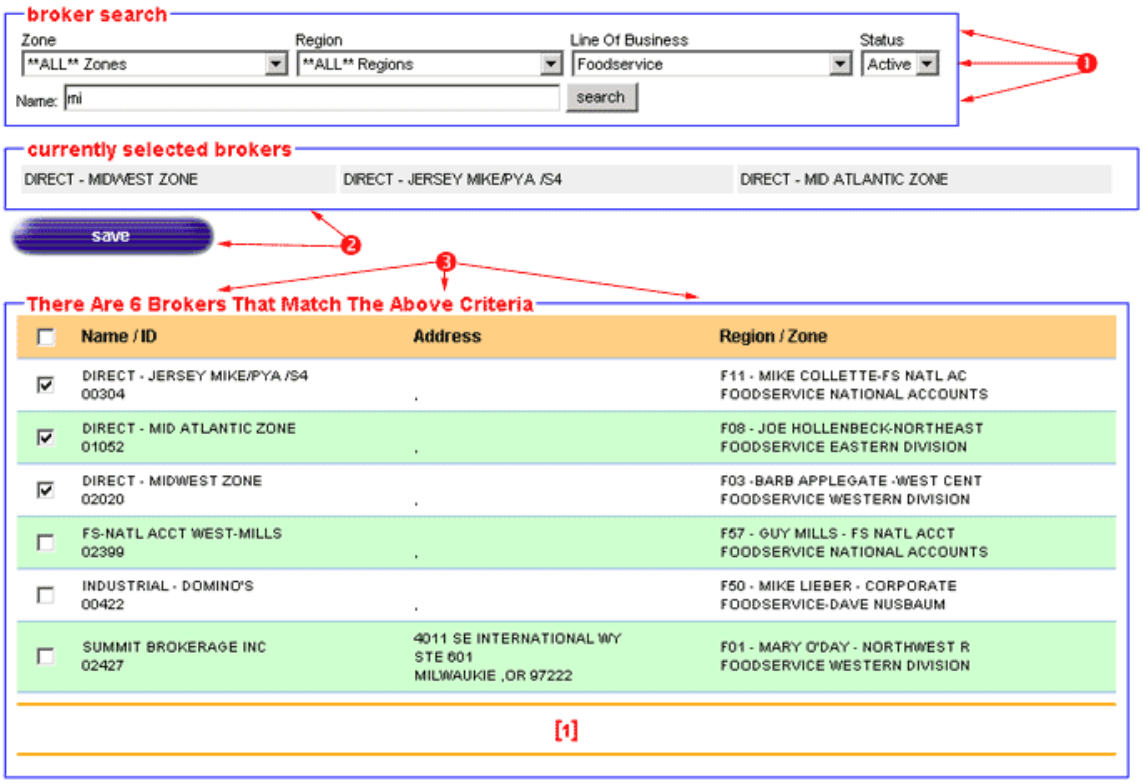

2) If the operator you would like to add to a program is not available through searching, you can add a new operator. Click on the [create operator] link. You will be asked to enter information about the operator. When you are finished, click on "save data". A confirmation screen will appear verifying the information you entered, and the operator will now be available to you when you search for them.

3) When you first view this field, it will be say: "None" for the currently selected operators. Once you have added and selected operators, they will appear in this area. In order to remove an operator you have selected, search for the operator or operators, and uncheck the box next to the operator name. Then click save. The operator will be removed.

4) To select an operator, check the box next to the operator's name. If you wish to select all operators returned by a search, simply check the box in the left hand side of the orange header. To remove an operator you have previously selected, uncheck the box next to the operator name. You can see additional pages of results (if more than one page is returned) by clicking on the red numbers at the bottom of the screen. You can save your changes by clicking on the "Save" button. Although you will be taken to the next screen, you can change your operator selections by clicking on the "Operator" tab in the top navigation.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Selecting Broker[s]

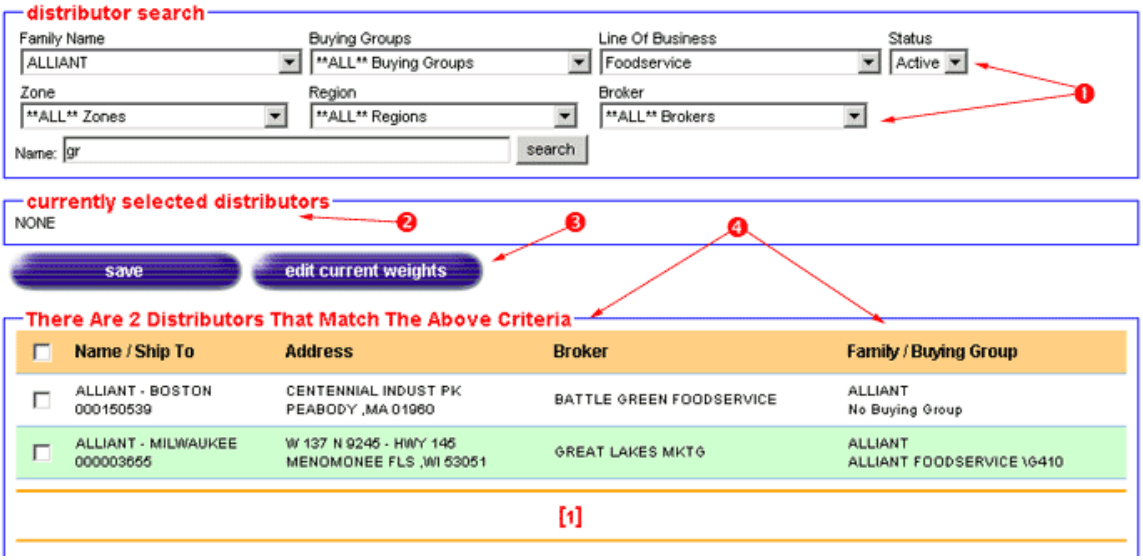

1) You can search for brokers to add to your program by five criteria: Zone, Region, Line of Business, Status, and Name. As with operators, selecting more criteria narrows the number of search results.

2) The first time you view this page, the "Currently selected brokers" will display as "none". Once you have selected and added brokers to the program, they will appear in the "Currently selected brokers" area.

3) To add brokers from the results returned by your search, simply click on the check box next to the broker's name. If you wish to select all the brokers on a result page click on the check box in the orange header. To save your choices, click on the "save" button. If you wish to modify your choices, choose the "Broker" tab from the top navigation.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Selecting Distributor[s]

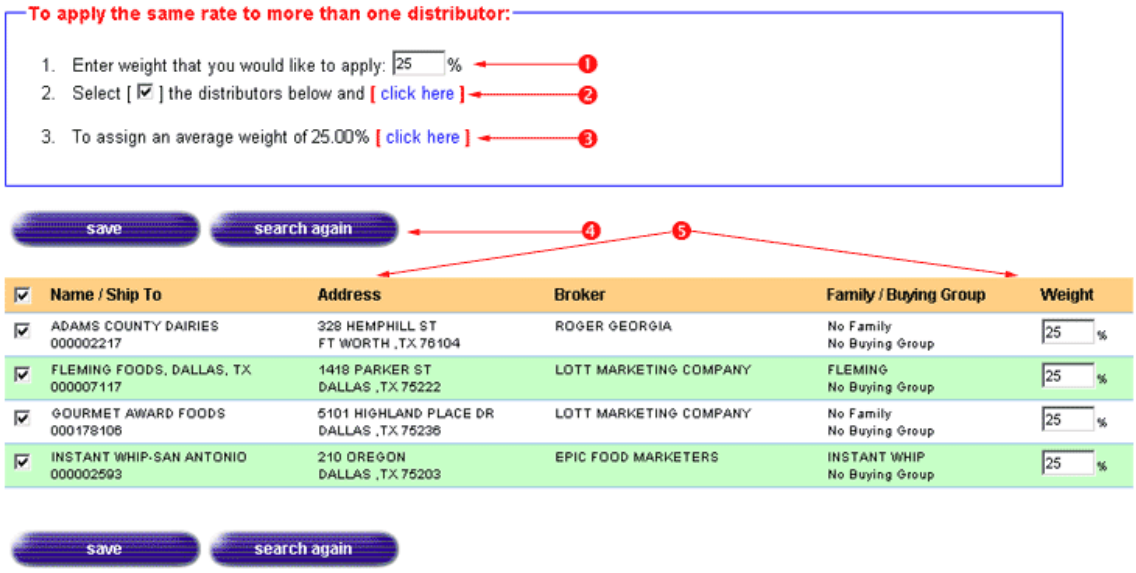

1) You can search for a distributor by Family Name, Buying Group, Line of Business, Status, Zone, Region, Broker or name. The more criteria you include about the distributor or distributors you are looking for, the fewer results will be returned.

2) The first time you view this page, the "Currently selected distributors" will display as "none". Once you have selected and added brokers to the program, they will appear in the "Currently selected distributors" area.

3) When you click on "edit current weights" you will be presented with the screen below. This screen is an opportunity to say what the weight for each distributor is. The weights are representative of the percentage of the program that each distributor represents. If an operator has two distributors carrying the products in this program, the weight will determine how much each distributor carries. For example, if an operator buys 80% of its string cheese from Operator A and 20% of its string cheese from Operator B, the weight for Operator A is 80% and the weight for Operator B is 20%. The weighting is also used to determine what the Trade Adjustment should be for each item.

4) To add distributors to your program from the results returned by your search, simply click on the check box next to the broker's name. If you wish to select all the distributors on a result page click on the check box in the orange header. To save your choices, click on the "save" button. If you wish to modify your choices, choose the "Distributor" tab from the top navigation. When you click save, you will automatically be taken to the screen below.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

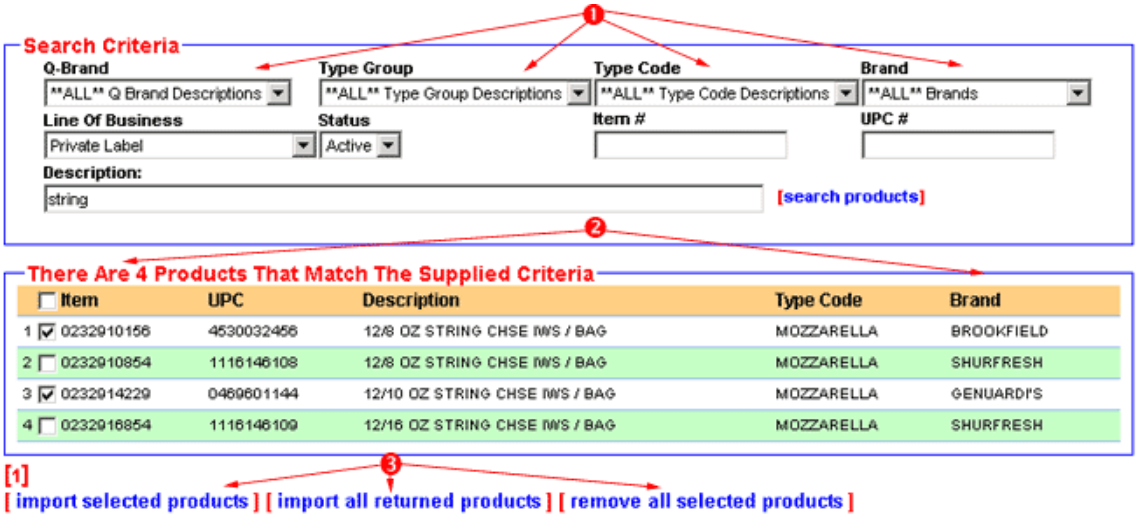

1) To apply the same rate to more than one distributor: If you wish to apply the same rate to multiple distributors, enter the amount you want the products weighted in the first box.
2) In the second option, you can choose to either select all the results by clicking on the check box in the text, or check the boxes individually yourself and then click on [click here] to apply the weight you entered to the distributors you selected.
3) If you wish to assign the same weight to all distributors equally, you can click on the [click here] next to "To assign an average weigh of XX%".
4) Search Again: If you decide to add or remove distributors from this list, click on search again. You will be taken back to the search screen, where you can search for, add, or remove distributors. All weights that you assigned previously will be lost, and you will be asked to add them again when you are satisfied with your choices.
5) If you wish to adjust the weight of each distributor individually, you can simply enter the percentage they should be weighted in the weight box on the right side of the screen. You do not need to check them if you are entering the weights manually.

NOTE: All distributor weights added together must equal 100%. If you assign weights that do not equal 100% you will receive an error message when you try to save.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Product Search Screen

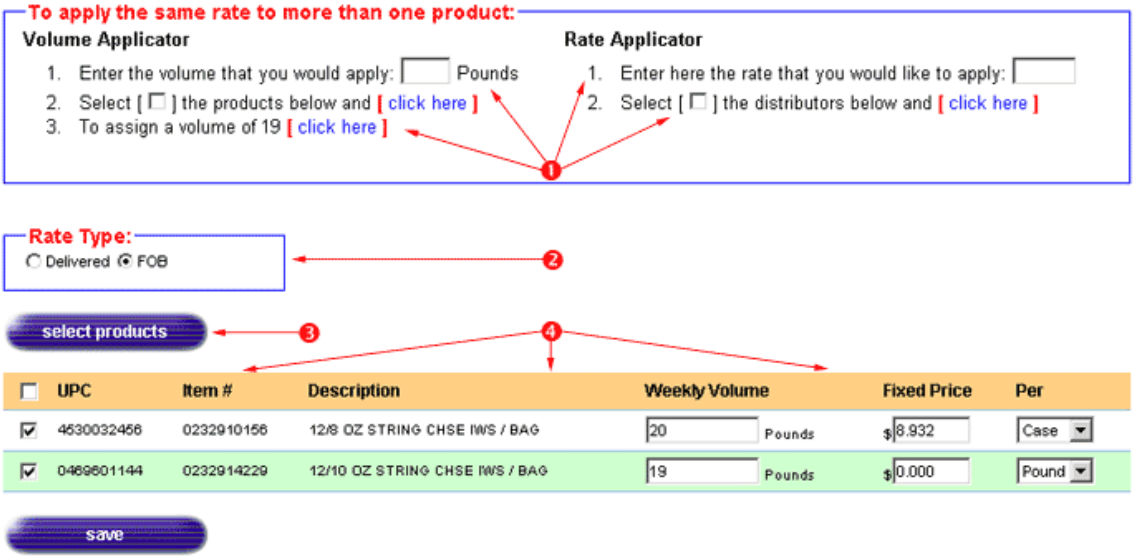

1) Products can be searched for by Q-Brand, Type Group, Type Code, Brand, Line of Business, Status, Item Number, UPC Number or Description. Select or enter the information you wish to search by and click on the [search products] link. The more criteria you enter, the fewer search results will be returned.

2) Once you have a search result you are satisfied with, select the products you wish to include in the part of the program you are working on. Products selected for Fixed Price will also be available for Rebate, but they do not necessarily need to overlap or have any connection to each other. You can select all products on a page by clicking on the check box in the upper left hand corner of the orange header. You must do this for every page of results you wish to select. Additional pages can be navigated to by clicking on the red page numbers at the bottom of the list of results.

3) You can import all check products into your program area by clicking on [import selected products]. If you wish to return all products found in a search, click on [import all returned products]. If you wish to remove products from a program, search for the products. They will already be checked. Then click on [remove all selected products]. You will be asked to confirm that you wish to remove the products.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Fixed Pricing

1) To apply the same rate to more than one product: You should ignore these options until you have selected the products you intend to have included in the fixed price portion of the program.

   The left hand options on this are the same as on the distributor weighting, except that this sets a volume in pounds instead of percentages, and does not have to equal 100%. The program does, however, calculate the number of units that need to be moved each week in order for you to meet your program volume goal set in the very first "Basic Information" screen. If you select the third option, the correct amount will automatically be entered in all selected products. The right hand options are to apply rates. If you wish to enter the same rate for multiple products, enter the rate in the box next to option one. If you want to include all products in one rate, click on the box inside the sentence. Other wise, check the boxes of the products you are applying the rate to and click on the [click here] to the right of the second element.

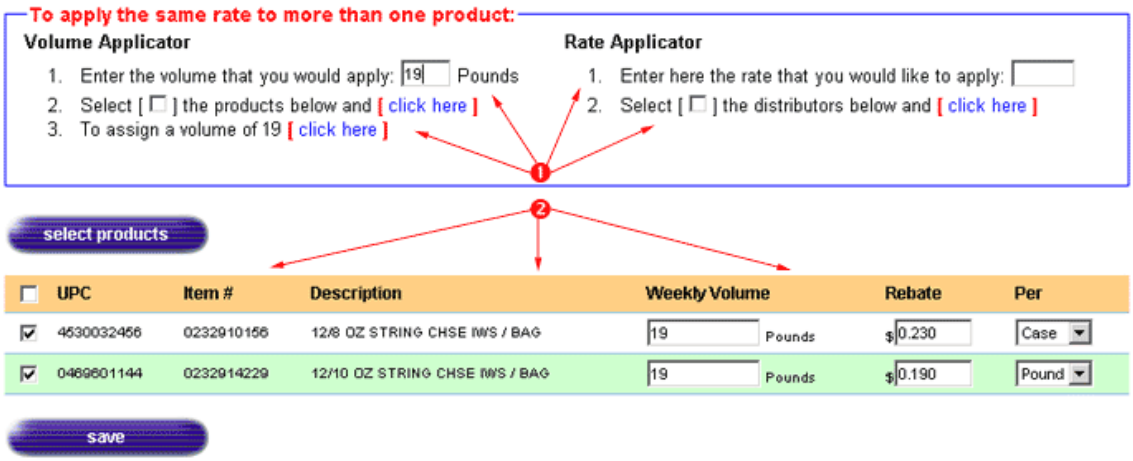

2) This option allows you to indicate whether the rate you are offering is Delivered or FOB.

3) Select Products: Clicking on this screen will take you to the "Select products" window described on the previous page.

4) If you wish to enter the volumes, prices, or packaging options individually, you can do so. You do not need to check the check boxes in order to enter the options individually. When you are done assigning options, click the save button. If the volume you have selected does not match the calculated weekly volume you will be shown an error message saying "The weekly volume you have just entered (X pounds) does not equal the calculated weekly volume for the whole program (X pounds). Press OK to continue or Cancel to adjust". You can either go back and change your settings so the volume is appropriate or you can continue on to the next screen. This warning is purely advisory.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Rebates

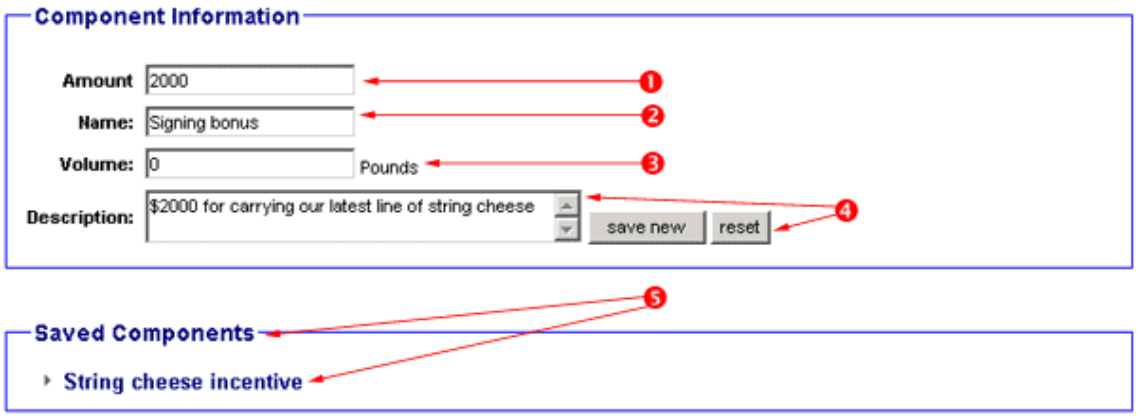

To apply the same rate to more than one product: You should ignore these options until you have selected the products you intend to have included in the fixed price portion of the program.

1) The left hand options on this are the same as on the distributor weighting, except that this sets a volume in pounds instead of percentages, and does not have to equal 100%. The program does, however, calculate the number of units that need to be moved each week in order for you to meet your program volume goal set in the very first "Basic Information" screen. If you select the third option, the correct amount will automatically be entered in all selected products. The right hand options are to apply rates. If you wish to enter the same rate for multiple products, enter the rate in the box next to option one. If you want to include all products in one rate, click on the box inside the sentence. Other wise, check the boxes of the products you are applying the rate to and click on the [click here] to the right of the second element.

2) If you wish to enter the volumes, prices, or packaging options individually, you can do so. You do not need to check the check boxes in order to enter the options individually. When you are done assigning options, click the save button. If the volume you have selected does not match the calculated weekly volume you will be shown an error message saying "The weekly volume you have just entered (X pounds) does not equal the calculated weekly volume for the whole program (X pounds). Press OK to continue or Cancel to adjust". You can either go back and change your settings so the volume is appropriate or you can continue on to the next screen. This warning is purely advisory.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Lump Sums

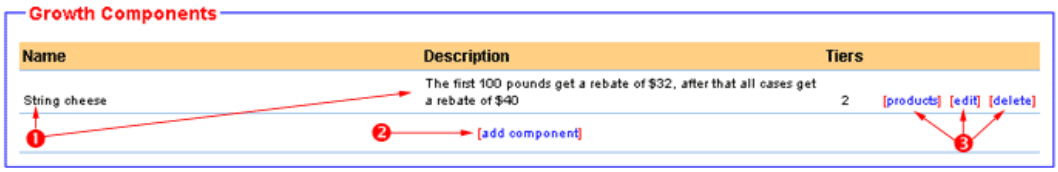

1) Amount: Enter the dollar amount of the lump sum you are establishing here. This is a required field.
2) Name: The name for the lump sum payment should be entered. This is also a required field.
3) Volume: The volume required to collect the lump sum amount. This can be entered as 0 for signing bonuses or other non-volume related lump sum amounts. (If the amount of this volume is different than the amount entered in the first "Basic Information" screen, an error message will appear saying "The total lump sum volume you have just entered (x cases) does not match the basic information page value (x cases). Press OK to continue or cancel to adjust." This warning is simply advisory.)
4) Description: A description of the requirements and information about the lump sum. Click on "Save New" to save this component. Click on "Reset" to clear all information from the Amount, Name, Volume and Description.
5) Saved Components: All components are listed in the "Saved Components" box.

NOTE: In order to progress to the next page, you need to use the navigation at the top of the screen.

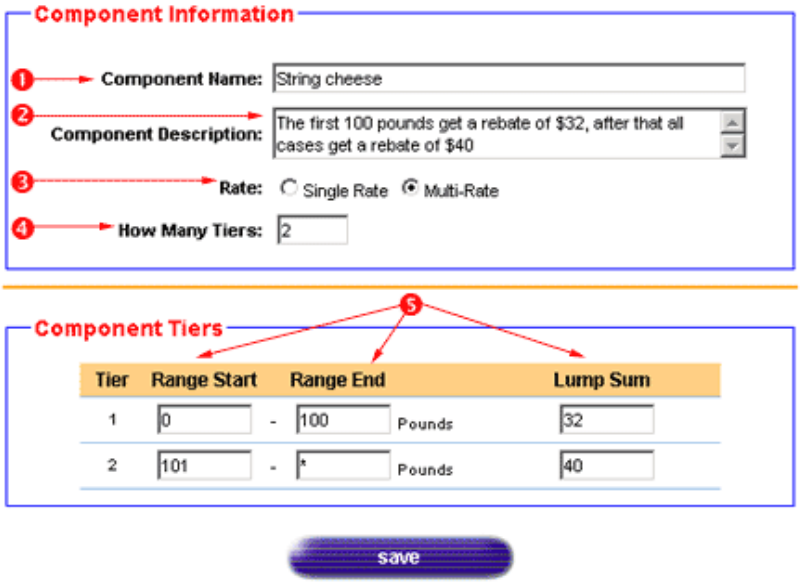

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Growth Components

1) Multiple growth components can be added to the program. A list of all growth components displaying names and descriptions is shown.
2) To see how to add a component, see below.
3) In order to modify the products included in a component click on the [products] link to the right of the component. To edit a component click on [edit] and to delete click [delete]. (You will be asked to verify that you do wish to delete the component.)

Add Component

1) Component Name: The name you assign to the growth component. This is a required field.
2) Component Description: This should describe how the component is intended to function in a real language version.
3) Rate: Select whether you wish one rate to be applied once the tier amount has been met (single rate) or whether different tiers will have different rates (multiple rate).
4) How Many Tiers: Enter the number of tiers this component have. This is a required field.
5) Component Tiers: For each tier you entered in step #4 you are asked to provide three pieces of information – a range start, a range end and a lump sum. If the end range for tier 1 is 100, then the start range for tier 2 needs to be greater than 100 (not equal to, greater than), 101 for example. If you wish to indicate that all amounts above a certain amount receive a certain rate, put that amount as the range start and an asterisk (*) for the range end. So for example, if you want all cases above 100 to be sold at one rate, your range start would be 101 and your range end would be *.

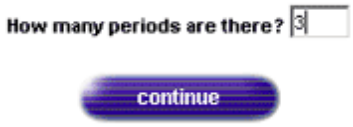

Click Save to save the component.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

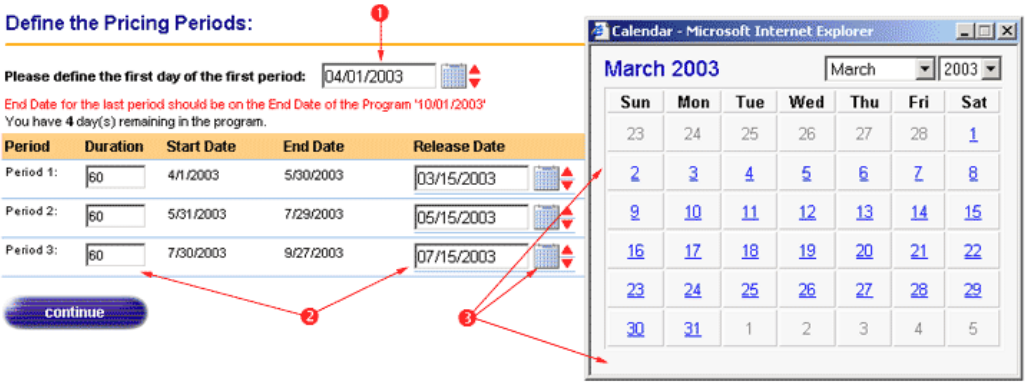

Formula Pricing

1) Program Status on Release: Select whether the program you are creating will be ready to go through the approval process (Read for Approval) or whether it will bypass the approval process and automatically become Pre-Active. The program will then become active on its start date.
2) Pricing Periods: When you arrive at the formula page you will first need to create pricing periods. You can do so by clicking on the [Click here to establish new pricing periods]. The following window will open.

Enter the number of periods you will be establishing in the formula. Click on continue.

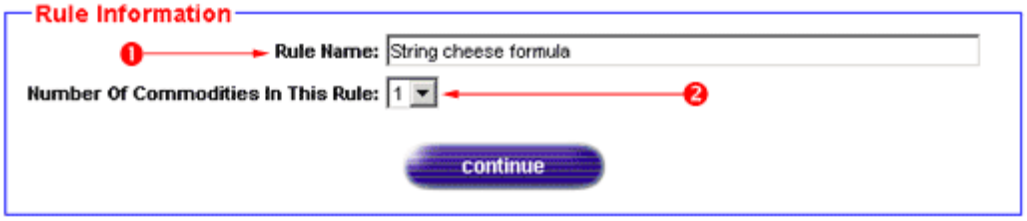

This screen asks you to define information about the pricing periods.

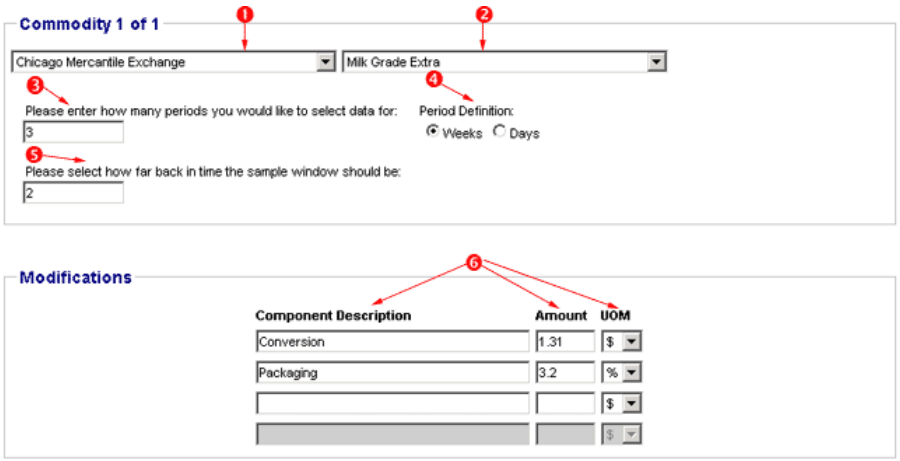

1) Please define the first day of the first period: Enter the day your first period would begin. A logical choice would be the first day of your program.
2) Select the duration of each period. The dates the periods run from start at the first day you entered, and then are incremented by the number of days you enter in duration. The last day of the last period needs to be the last day of the program. You will receive an error message and not be able to save your periods unless that is true. You may also select the date at which commodity prices will be sampled to set the prices for the period in the Release Date field.
3) You may either enter the release date in the field, or click on the calendar icon to the right. If you click on the calendar icon, you can select the month and year of the release date. The window will close when you click on the date. The red arrows to the right of the calendar icon can be used to increment or decrement the date of the release by one day.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Pricing Rules: Once you have established the pricing periods, you can set the pricing rules by clicking on the [Click here to add rule] link.

1) Rule Name: Enter the name for the price rule you are creating.
2) Number of Commodities in This Rule: Select the number of commodities that will be used in the making of this rule. Click on continue to go to the next screen for selecting pricing rules.

For each commodity you selected on the previous page, you need to specify the following information.

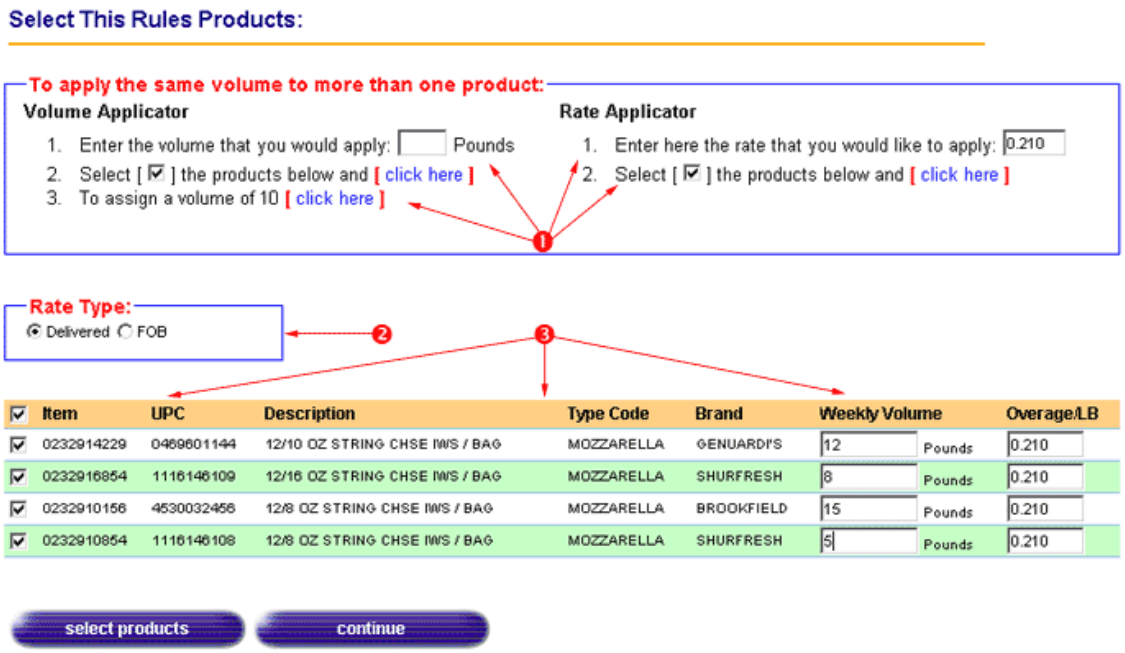

1) Select the market or exchange that carries the commodity you are looking for.
2) The commodities available in this list depend on selections made in step 1. If you do not see the commodity you are looking for, make sure you have selected the correct market or exchange.
3) Please enter how many price periods you would like to select data for.
4) Period Definition: Select whether you would like your periods defined by weeks or by days.
5) Please select how far back in time the sample window should be: Enter the number of days or weeks (depending on your select in the period definition) back in time the sample window of data should be taken.

Repeat this information for each commodity you selected. If you have selected more than one commodity, you will be asked to weight each commodity. The total amount for the commodities needs to equal 100%.

6) Modifications: If you need to alter information about the commodity, you can do so here. Enter a description of the component you are entering, the amount of change, and whether the amount is a dollar amount or percentage.

Click on continue to go to the next screen.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

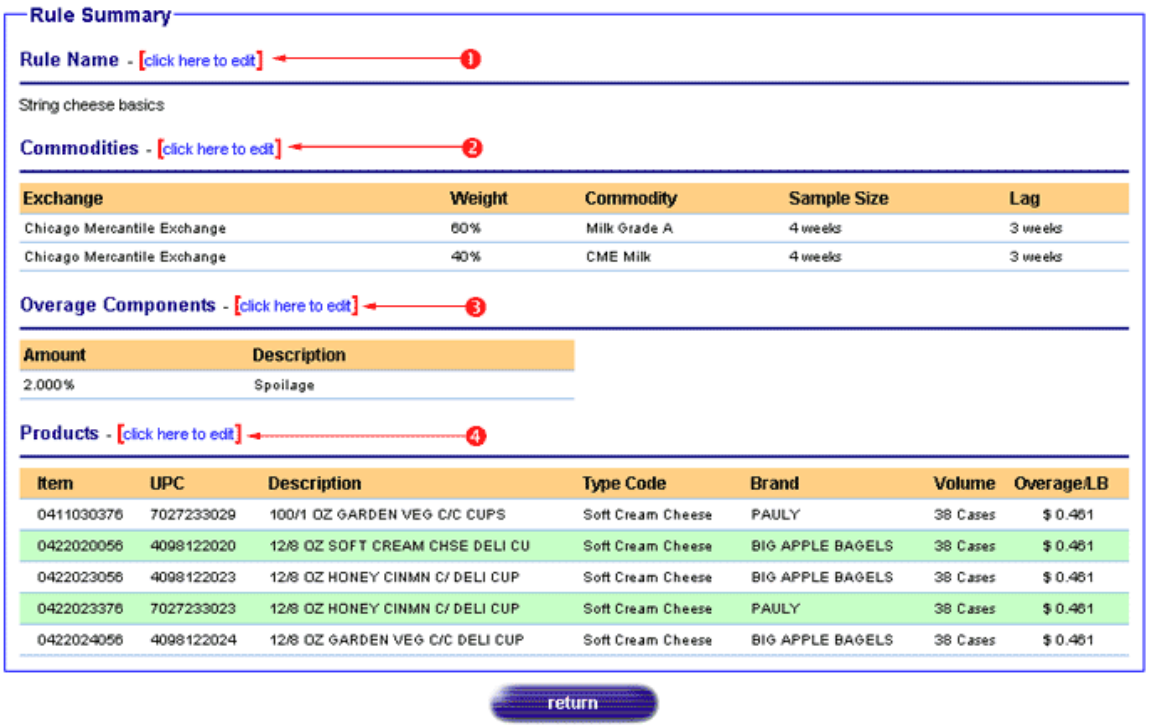

Click on select products and go through the product selection process as outlined <link to product selection here>.

1) To apply the same volume to more than one product: Apply the volume and rate to the products as described <enter link here>.

2) Rate Type: Select whether this pricing rule is for Delivered or FOB orders.

3) You may apply volume and overage to each individual product. You do not need to check the box on the left hand side of the product to set its individual volume and overage.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Rule Summary

Rule Name - [click here to edit] ❶

String cheese basics

Commodities - [click here to edit] ❷

Exchange	Weight	Commodity	Sample Size	Lag
Chicago Mercantile Exchange	60%	Milk Grade A	4 weeks	3 weeks
Chicago Mercantile Exchange	40%	CME Milk	4 weeks	3 weeks

Overage Components - [click here to edit] ❸

Amount	Description
2.000%	Spoilage

Products - [click here to edit] ❹

Item	UPC	Description	Type Code	Brand	Volume	Overage/LB
0411030376	7027233029	100/1 OZ GARDEN VEG C/C CUPS	Soft Cream Cheese	PAULY	38 Cases	$ 0.461
0422020056	4098122020	12/8 OZ SOFT CREAM CHSE DELI CU	Soft Cream Cheese	BIG APPLE BAGELS	38 Cases	$ 0.461
0422023056	4098122023	12/8 OZ HONEY CINMN C/ DELI CUP	Soft Cream Cheese	BIG APPLE BAGELS	38 Cases	$ 0.461
0422023376	7027233023	12/8 OZ HONEY CINMN C/ DELI CUP	Soft Cream Cheese	PAULY	38 Cases	$ 0.461
0422024056	4098122024	12/8 OZ GARDEN VEG C/C DELI CUP	Soft Cream Cheese	BIG APPLE BAGELS	38 Cases	$ 0.461

return

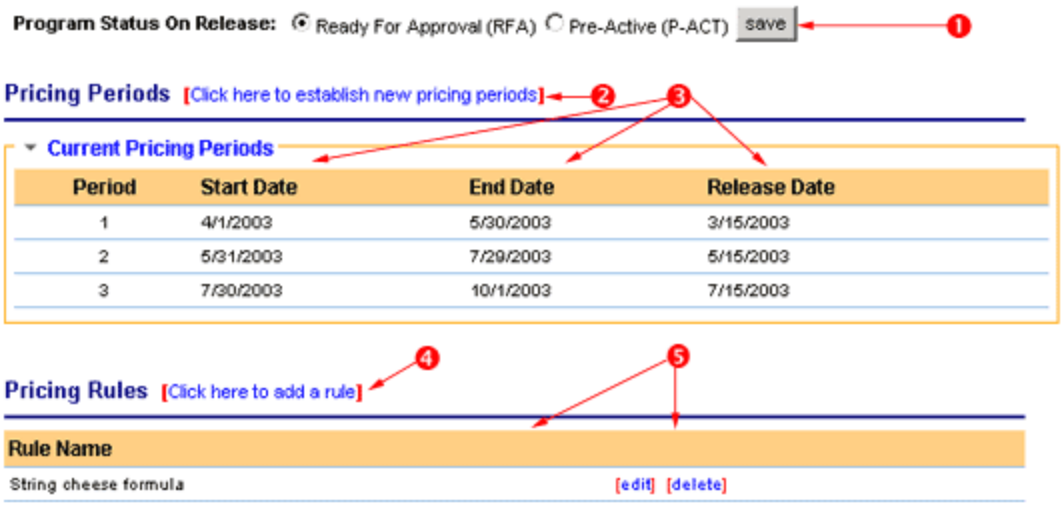

Once you have completed this, you are offered an opportunity to review all your selections.

1) Rule name: Click on [click here to edit] to change the rule name.
2) Commodities: Select [click here to edit] to change the commodities you have selected.
3) Overage Components: Click on [click here to edit] to modify your overage components.
4) Products: Click on [click here to edit] to modify the products in this pricing rule.

When you are satisfied with your selections, press return.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

7) Final step:

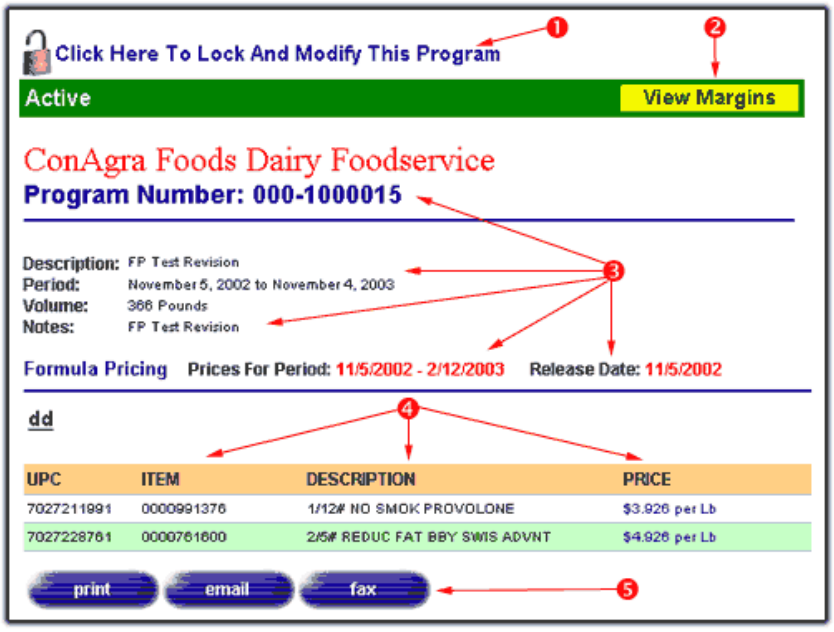

1) Verify your program status on release choice.
2) If you wish to change the pricing periods, click on [Click here to establish new pricing periods]
3) Review your current pricing periods.
4) If you wish to add an additional rule to the formula, click on [Click here to add a rule]
5) You can edit or delete existing rules.

Review

Once you are finished with the formula, you have completed all possible program types for the template you selected. To review the information you have entered, click on the upper left hand tab: View Program.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

View Program

1) When you first arrive at the program detail screen, the information will be for your review only. If you wish to modify the program, click on the lock. If someone else is currently modifying the program, the lock will appear closed and text will appear in red showing who has locked the program.

2) The information in the upper right hand corner of the screen changes depending on what the status of the program you are looking at is, and what your permissions are. You may have permission to view margins, to approve programs, both, or neither.

   - *Work in Progress:* There are no options for work in progress. Once you lock the program, you can mark the program as ready for approval.
   - *Request for Approval:* Once you lock the program, if you have approval permissions, you may approve it. If you have margin permissions but not approval permissions, you will see an option to view margins.
   - *Pre Active:* If you have margin permissions, you will see the "View Margins" option.
   - *Active:* If you have margin permissions, you will see the "View Margins" option.
   - *Expiring:* If you have margin permissions, you will see the "View Margins" option.
   - *Expired:* No option is shown.

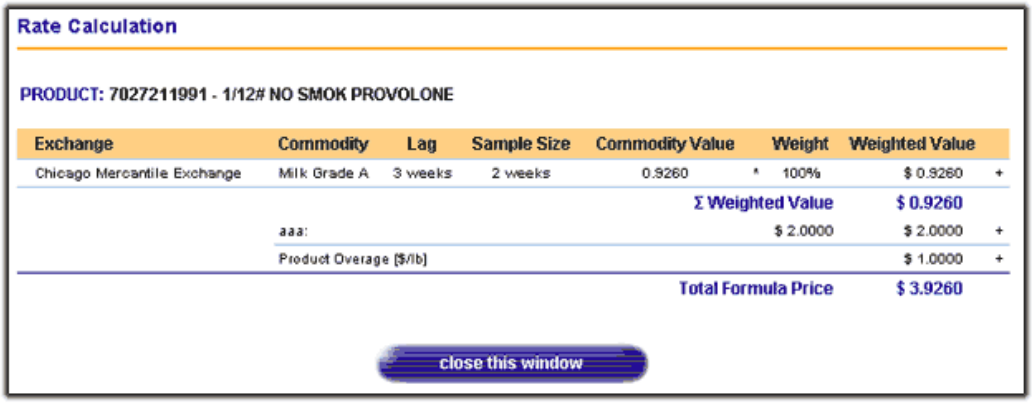

3) Information about the program is shown here. If you wish to edit this information, you need to lock the program. You will then be taken to a screen which will allow you to edit the information.

4) Details about the products included in the program are shown here. Lock the program to edit this information.

5) The number of options depends on the status of the program, your permissions and whether or not the program is locked. View the Program Options help [LINK HERE] for information.

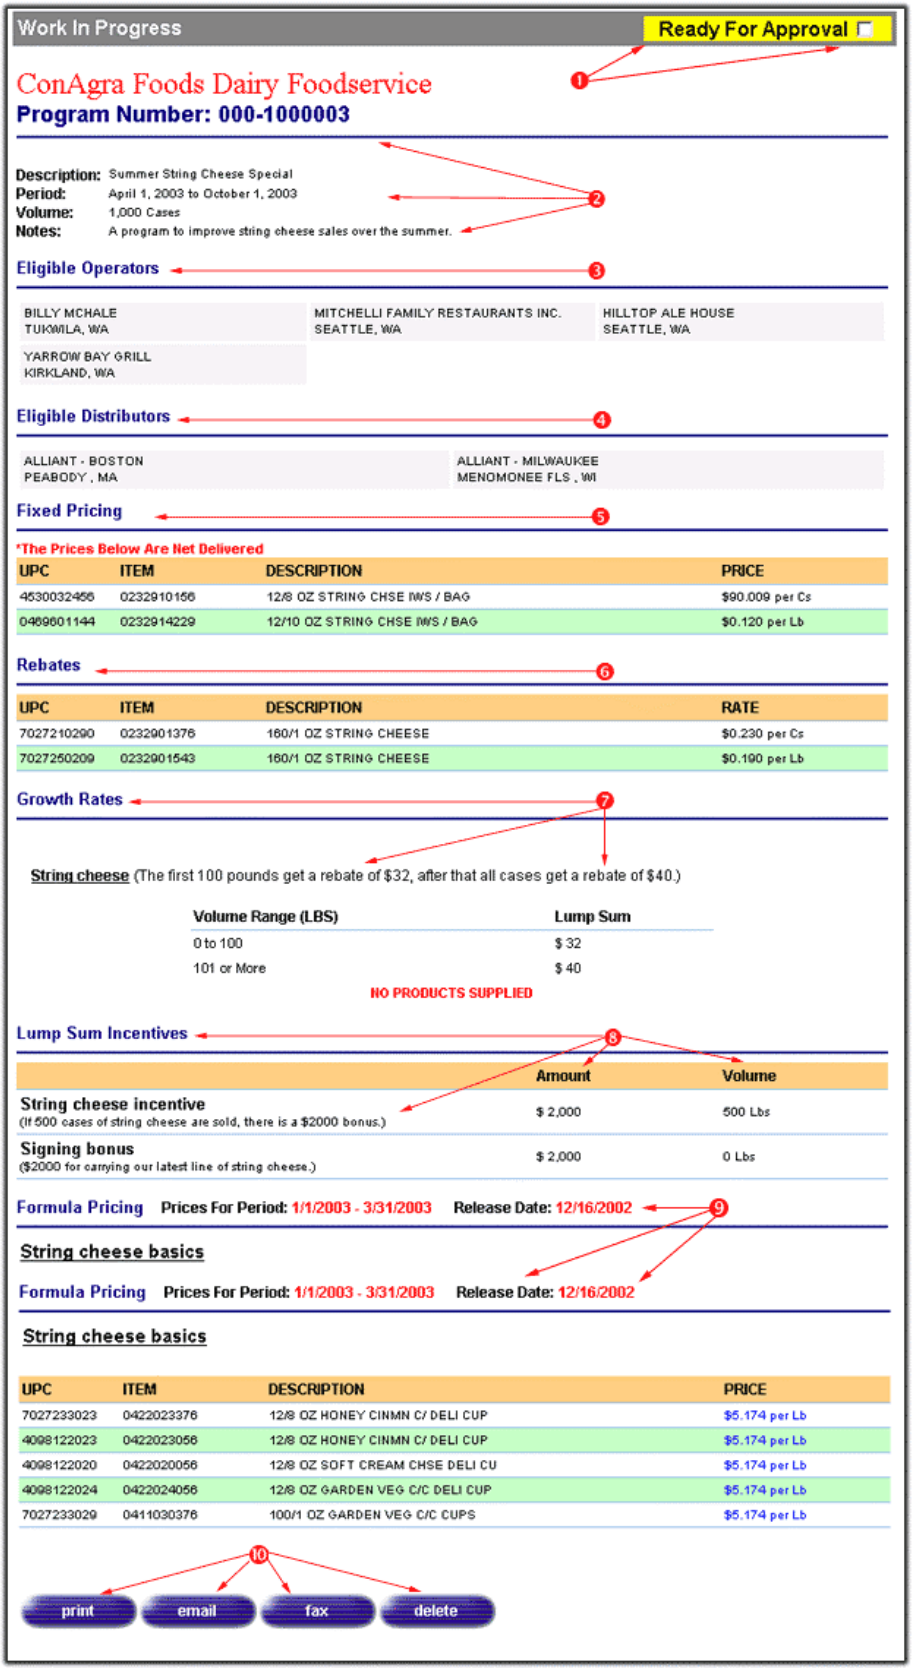

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Formula Price Details

If you have permission to view pricing rules, when you view program, you may notice that "Price" as a link shown in blue. Clicking on one of the numbers will bring up the above screen, which shows the pricing rules for the product price you clicked on. These pricing rules are set by administrators, and can be set or changed in Programs -> Commodity Pricing.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

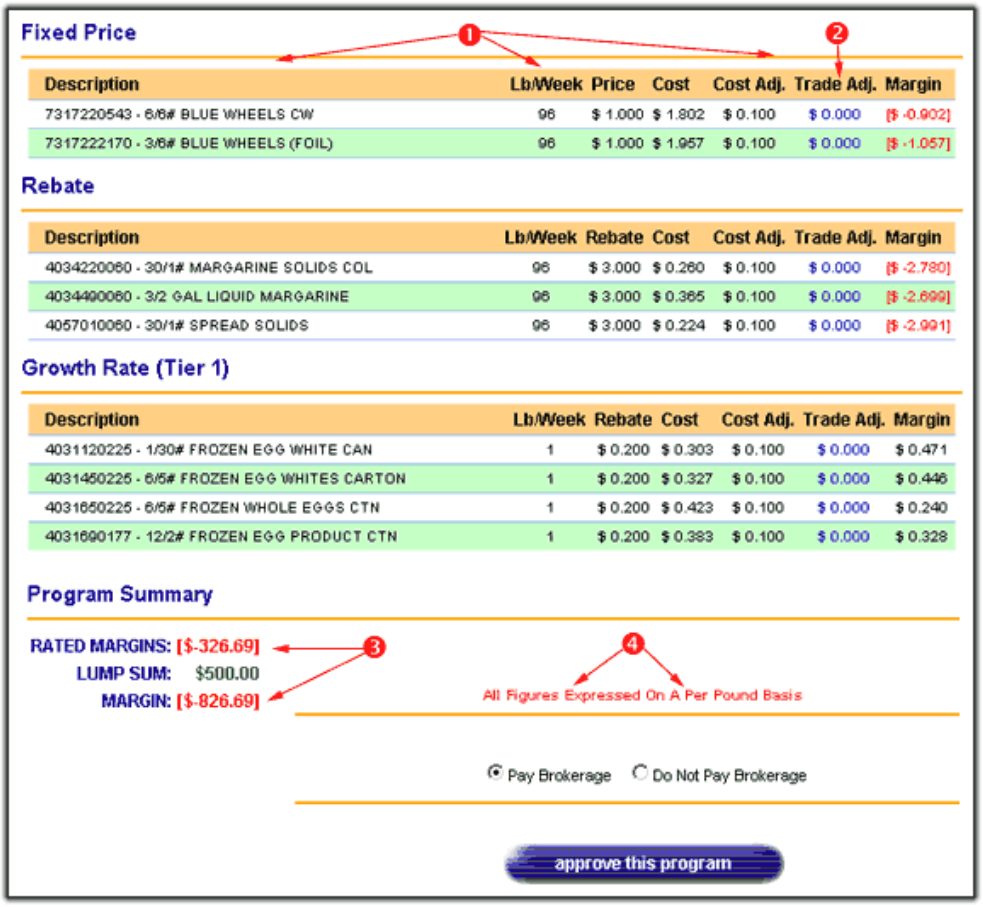

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

1) Ready for Approval: When the program you have created is ready to be approved, click on the "Ready for Approval" check box. A dialogue box will appear and ask you to confirm that the program is ready to begin the approval process. The program will then be moved from the "Work in Progress" area to the "Request for Approval" area.
2) This displays basic information about the program you have created. To edit this information click on "Basic Information" in the top navigation.
3) Eligible Operators: The operators you added to the program. Click on "Operator" in the navigation to change this information.
4) Eligible Distributors: The distributors in your program. Click on "Distributor" to change this information.
5) Fixed Pricing: View the fixed pricing you have established. Edit this information by clicking on "Fixed Price" in the top navigation.
6) Rebates: View the rebates for this program. Edit the rebate by clicking on "Rebate" in the navigation.
7) Growth Rates: Information about the program growth rates is shown here. Click on "Growth" in the navigation to change this information.
8) Lump Sum Incentives: The lump sum incentives you created for this program are shown here. Click on "lump sum" to modify this information.
9) Formula Pricing: The formula you established. Choose "formula" from the navigation to change this information.
10) You can print, email, fax or delete this information.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Approval for New Program

1) You can review the details for the program you are thinking about approving. You can only view, not change, this information. To change this information go back to the program detail and select "Revise".

2) If you would like to view the trade adjustment, click on the number shown in blue. The trade adjustment screen will pop up. If you have permission to view margins, you will be able to see information about Rated Margins, Lump Sums and Margins.

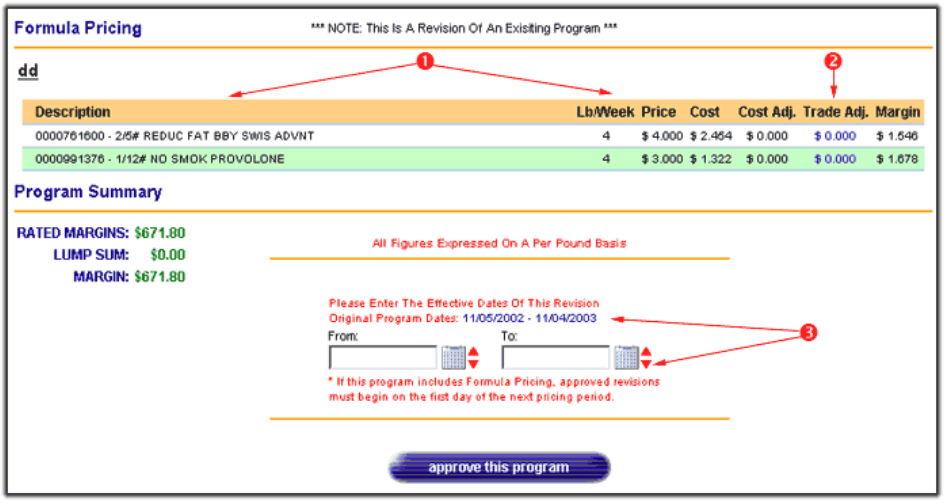

3) If the program margin is within your approval level, you will be given the option to "Pay the Brokerage" or "Do Not Pay Brokerage". Make your selection and then click "Approve This Program". Once the program is approved – if the start date is before or equal to the current date, the program will become active. Otherwise, it will become Pre Active until its start date.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Approval for Revised Program

If you are an administrator, you may be asked to approve programs. You can approve a program by selecting it from the Pre Active programs. Click on the lock image to lock the program. In the upper right hand corner of the screen, in yellow, will appear the option to "Click Here To Approve This Program". When you click on it, an alert will appear saying "The data processing which is about to occur which will take several minutes of which there will be no activity on the screen. Please wait." Click "OK".

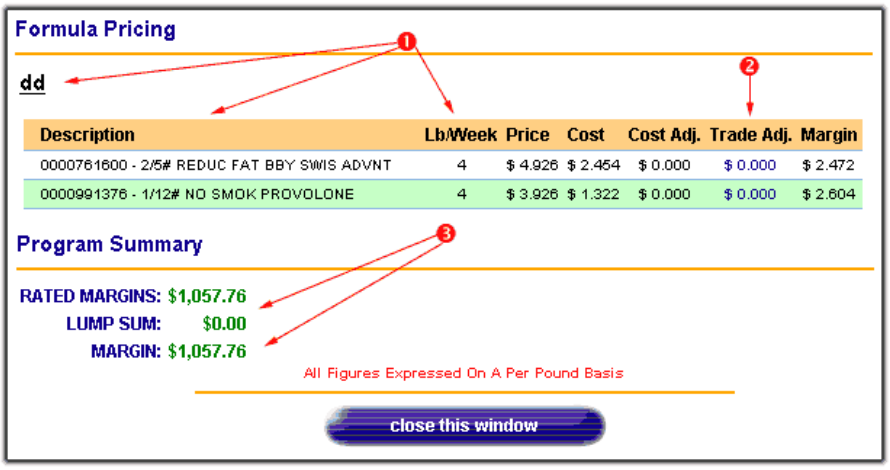

The following screen is an example of the approval for a revised program:

1) You can review information on the program here. The amount of information shown here will vary depending on how much information the program contains.
2) If you would like to view the trade adjustment, click on the number shown in blue. The trade adjustment screen will pop up. Click here to view help files on trade adjustment information.
3) You need to enter the dates the revision will be effective for. You cannot set the start date any earlier than the day you are approving the revision, and you cannot set the date any later than the end of the original program.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

View Margins

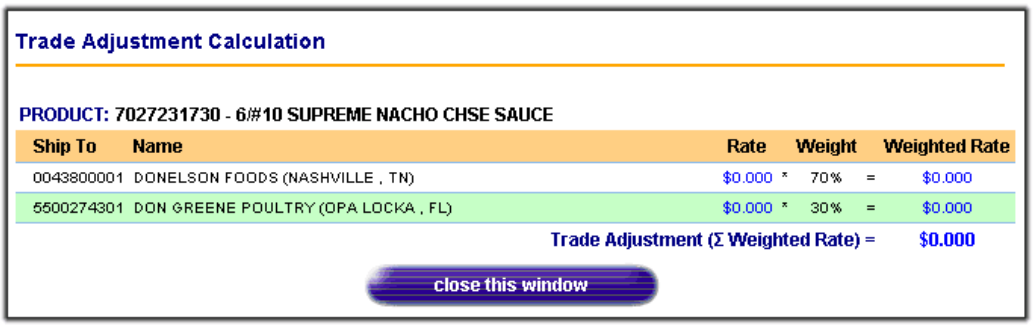

On Pre Active, Active, Expiring and Expired programs, once you have locked a program, if you have permission to view margins, you will see a yellow bar in the upper right hand margin which will allow you to view margins. This information cannot be modified or edited from this screen.

1) You can review information about the products that comprise your program.
2) Clicking on the blue number for Trade Adjustment will open the trade adjustment screen.
3) If you have permission to view margins, you will be able to see information about Rated Margins, Lump Sums and Margins.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Trade Adjustment

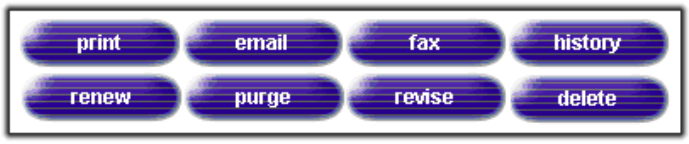

You can view information about the trade adjustment, including the rate of the adjustment, the weighting for distributors in the adjustment, and the final rate including those two components.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

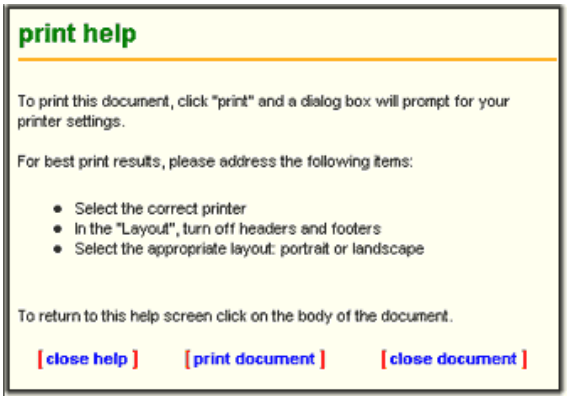

Program Options

As you view programs with different statuses, and according to your permissions, you may see the options below:

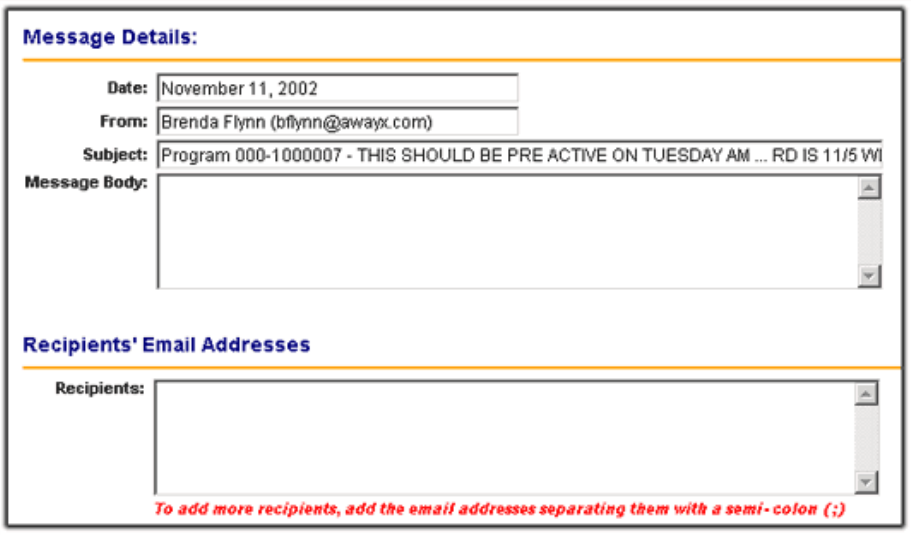

The following options will appear everywhere:

- *Print:* Allows you to print the program. The following dialogue box will appear.

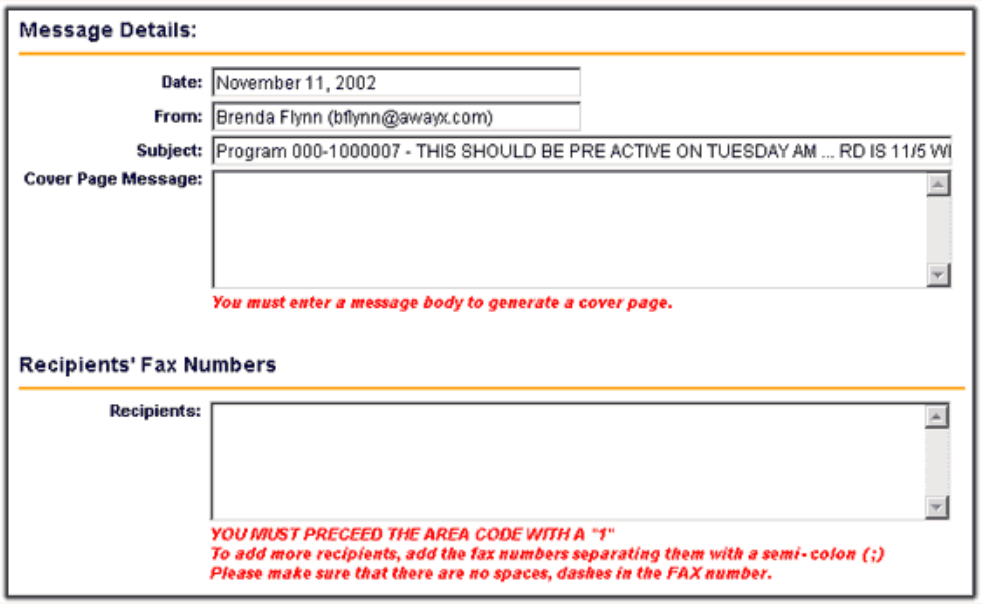

Click on [print document] to print the document.

- *Email:* You may email the program to various mail recipients. You will need to provide the following information.

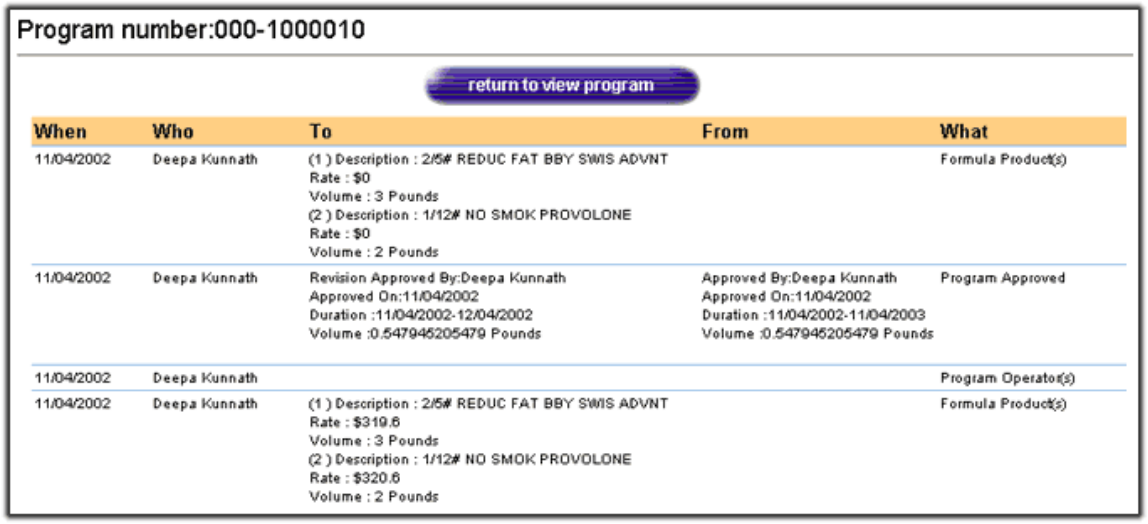

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

- *Fax:* Allows you to fax the program. You will need to enter the following information.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

- *History:* The history tab is available only for programs that have been approved. Clicking on it will bring up the following screen:

Program number:000-1000010

return to view program

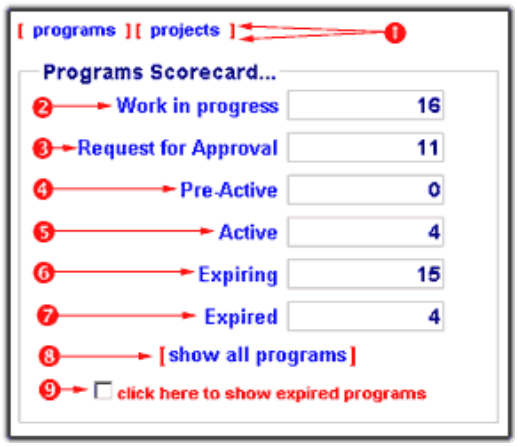

When	Who	To	From	What
11/04/2002	Deepa Kunnath	(1) Description : 2/5# REDUC FAT BBY SWIS ADVNT Rate : $0 Volume : 3 Pounds (2) Description : 1/12# NO SMOK PROVOLONE Rate : $0 Volume : 2 Pounds		Formula Product(s)
11/04/2002	Deepa Kunnath	Revision Approved By:Deepa Kunnath Approved On:11/04/2002 Duration :11/04/2002-12/04/2002 Volume :0.547945205479 Pounds	Approved By:Deepa Kunnath Approved On:11/04/2002 Duration :11/04/2002-11/04/2003 Volume :0.547945205479 Pounds	Program Approved
11/04/2002	Deepa Kunnath			Program Operator(s)
11/04/2002	Deepa Kunnath	(1) Description : 2/5# REDUC FAT BBY SWIS ADVNT Rate : $319.6 Volume : 3 Pounds (2) Description : 1/12# NO SMOK PROVOLONE Rate : $320.6 Volume : 2 Pounds		Formula Product(s)

You can see when a change was made, who made it, what the new value is, what the old value was, and what portion of the program was changed.

- *Renew:* You may renew a program in any status. When you choose to renew a program, an alert will ask you "Are You Positive You Want to Renew This Program?". If you wish to renew the program, click "OK". You will then be able to edit the program.
- *Cancel:* After a program is approved, it is available to be cancelled. When you click on cancel, an alert will appear asking you "Are You Positive You Want to Cancel This Program?" If you are positive, click "OK". You will be brought back to the home page. At that point, the program you cancelled will marked as "Expired" and will appear in the Expired section.
- *Delete:* Programs can only be deleted when they are a Work in Progress or Ready For Approval. After that point they need to be cancelled and Purged. When you click on "Delete" and alert will appear asking you "Are You Positive You Want to Delete This Program?" If you want to delete it, press on "OK". The program will be permanently deleted, and will not be available anywhere.
- *Purge:* Purging is only available for expired documents. If you wish to remove a program from the list of expired programs, click on "Purge". An alert will appear asking "Are you Positive You Want to Purge This Program?" Click on "OK" if you do. The program will be removed from the list of expired programs.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Program Scorecard

You can review information about all programs and projects you have permission to see in the scorecard on the front page.

1) You can toggle between viewing the scorecard for programs and for projects by clicking on the appropriate link at the top of your page. The link will display the scorecard you selected. If you only have permission to access programs, you will not see the projects, link, and clicking on the programs link will have no effect.

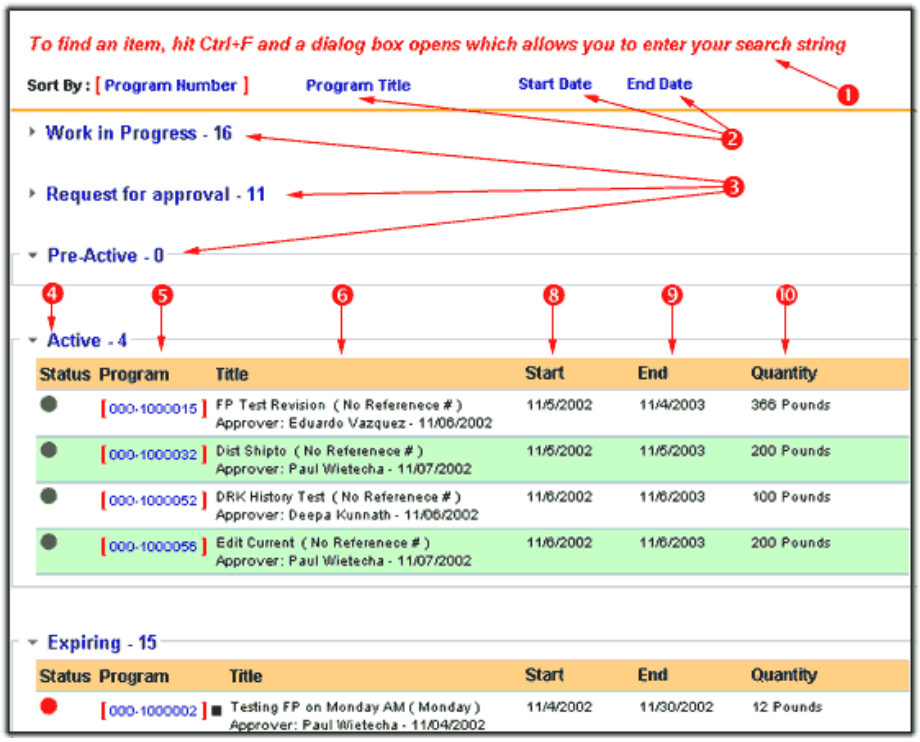

2) – 7) Clicking on any one of these links shows the programs that are in that state. An explanation of what each status means can be found on the next page.

8) If you wish to see all the programs available to you, click on [show all programs]

9) If you would like to see expired programs in the list of all programs, check the box next to "click here to show expired programs" before you click on [show all programs]

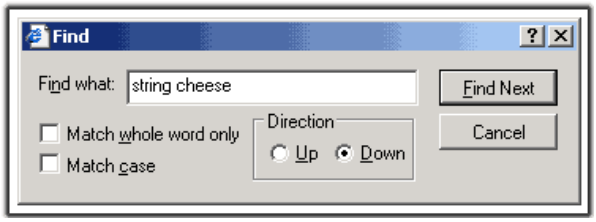

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Scorecard detail:

No matter what your selection on the previous page, you will be taken to this screen. The selection you have made displays all the details for the status you have chosen, but you can still display other programs by clicking on the name of the status you wish to view.

1) If you wish to find a particular word, phrase or number, you can search for it by holding down the Ctrl key and then hitting "F" at the same time. This will open a windows dialog box.

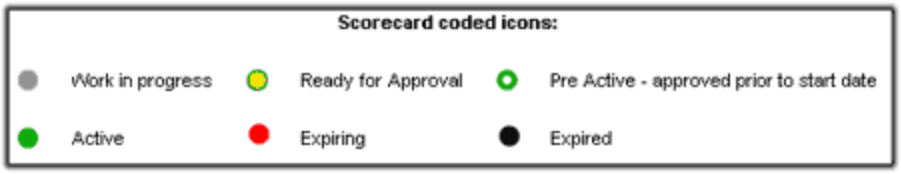

You can search for words or numbers entered in the "Find what" area. You can search by the entire word (for example, if you were to enter "an", clicking on whole word only would return only examples of "an". "And" "anteater" "anterior" and "can" would not be returned. They would be returned if "Match whole word only" is not checked.) You can also match by case, so that if you type "String Cheese" and check "match case" you will not find "string cheese". Be sure you check for a word both "up" and "down".

2) You can sort the page one of four ways: by program number (default), by program title, by start date and by end date.

3) There are six possible status settings for programs:

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

- *Work in Progress:* A work in progress is a program that is in the process of being edited, but that has not been submitted for approval.
- *Ready for Approval:* Indicates that a program has been completed by its creator, and is ready for approval.
- *Pre Active:* When a program is pre active, it has been approved, but the start date is after the current date.
- *Active:* An active program is currently in force.
- *Expiring:* A set amount of time before the end date of a program, the program is shown as expiring. If you are an administrator, you can establish the number of weeks before the end date a program is shown as expiring by going to Settings -> Administrative -> Programs -> Expiring Age.
- *Expired:* Programs whose end date has passed are marked as expired.

4) You can see the status of items by the color of the circle next to it and the heading it is under. Clicking on the heading will either expand the list of programs that have that status, or minimize the list. You will also notice a small black box next to some programs. The box indicates that the program is a revision of a previously approved program.
5) To edit or view details of the program, click on the program number.
6) The title, approver (or person who requested approval), and date are shown. You can sort the list by the title.
7) The proposed beginning date for the program.
8) The proposed end date for the program.
9) The quantity required in the program.

If you click on a program number, you will be able to view the program.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Project Scorecard

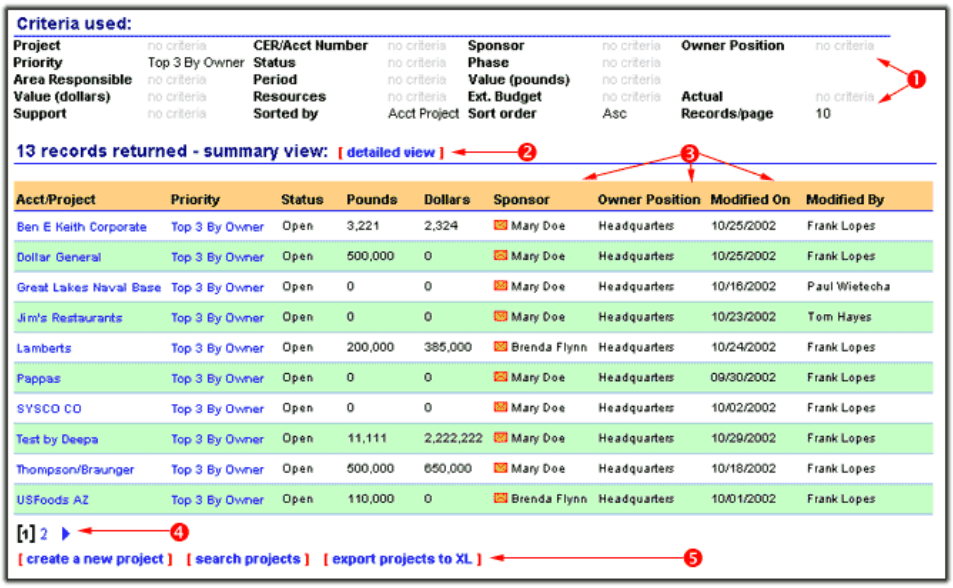

1) You can toggle between viewing the scorecard for projects and programs by clicking on the appropriate link at the top of the scorecard screen. If you are already displaying the scorecard whose link you are clicking on, nothing will happen.

2) A summary of priorities and the number of projects for each priority is shown. The priorities available can be changed or created in the projects section of the administration area.

3) If you wish to see all projects, click on [show all projects]. If you wish to search for a particular project or projects, click on [search projects].

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Summary View

1) No matter whether you clicked on a priority from the scorecard, searched for a project, or decided to view all projects, you will see this screen. The information at the top, under "Criteria used", you can see the criteria used to show the projects you see. In this instance, the records shown all have the priority "Top 3 By Owner". If the records all resulted for a search for the sponsor Brenda Flynn, then next to "Sponsor" would be the value "Brenda Flynn".

2) If you wish to see more information about each project shown, click on the [detailed view] link. You will be taken to another screen. Click here to see information about that option.

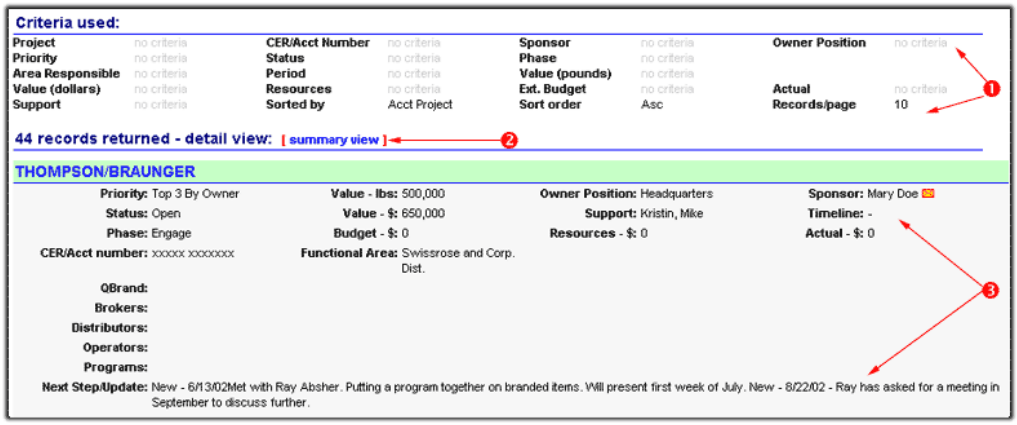

3) Information about various programs is shown here. You can click on the program name or by the priority name to see and modify information about a project. Clicking on the envelope icon next to a sponsor's name will launch an email window to that sponsor.

4) If more than one page of results is shown, you will see these numbers at the bottom of the screen. To go to the next page of results, click on either the number of the page you'd like to see, or on the arrows pointing right for the next page and left to return to the previous page. You can identify the current page because the page number will be shown in black and surrounded by brackets.

5) You can create a new project by clicking on the [create a new project] link or find an existing project by clicking on [search projects]. You can export the list of projects to an Excel spreadsheet by clicking on the [export projects to XL].

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Detailed View

1) The criteria used to determine which projects to display is the same is in the project summary view.
2) If you wish to see a summary of projects instead of more detail about them, click on the [summary view] link.
3) In addition to the information displayed in the summary view, the detailed view also shows information such as the Qbrands, Brokers, Distributors, Operators and Programs involved in the project, and the Next Steps for the project.

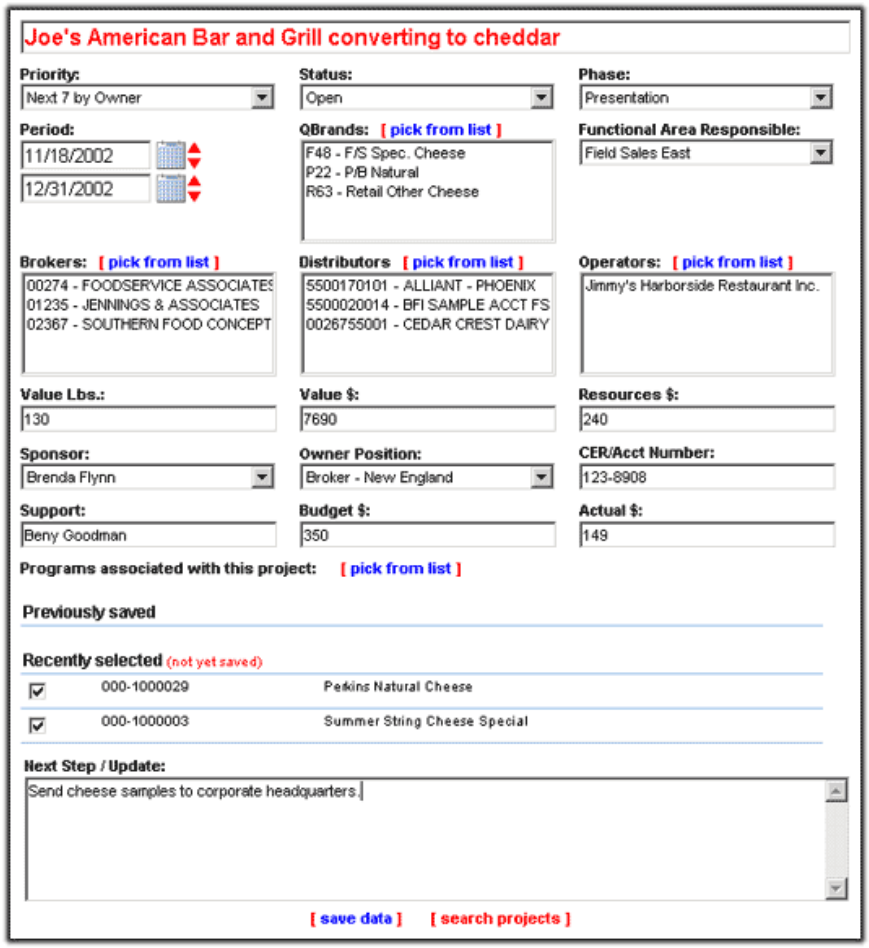

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Project View – Create New Project

If you are amending a project instead of creating one, you will be given the option to delete the program as following:

If you want to delete the project, select the delete this project option and click on [save data]. You will NOT receive a confirmation screen – the information will automatically be deleted. Be sure you want to delete the information before choosing this option.

If you are creating a new project or amending an existing project, you will be taken to this screen. If you are amending a project, you will see the information that has already been entered.

- Name: Enter the name for your project in the bar at the top of the screen. You must enter a name for your project.
- Priority: You can select the priority to which the project you are creating belongs.
- Status: Select the status for your project. Options are Open and Closed.
- Phase: Enter the phase to which this project belongs.
- Period: Select the open and close dates for the period of the project. The opening date is on the top. You can enter the date in the field, select it from the calendar by clicking on the icon to the right of the

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

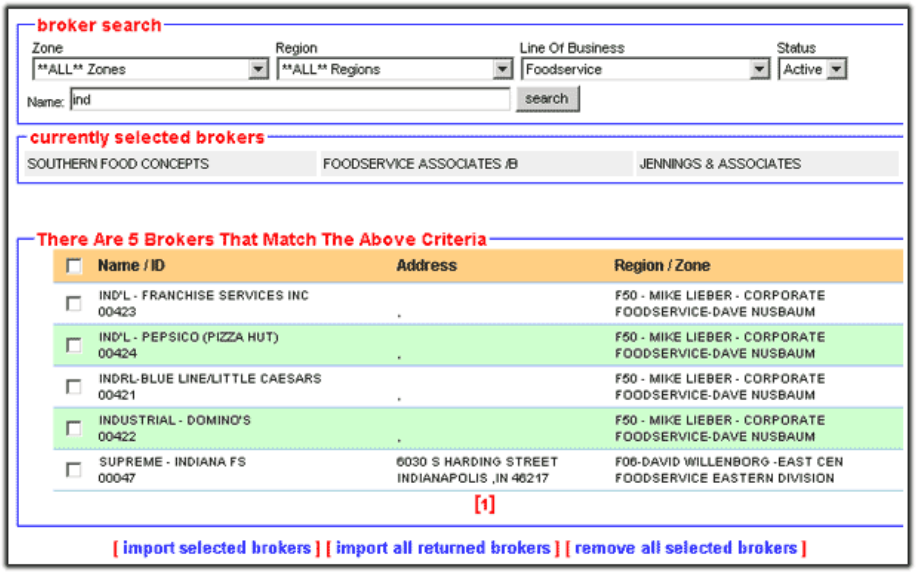

field, or increment the date by one day using the up and down arrows. The closing date is the bottom of the two dates.

- Qbrands: Select the Qbrands in the project. You can open a selection window by clicking on [pick from list]. You will see the following screen:

Select the Qbrands you are interested in by clicking on the boxes on the left. When you are satisfied with your selections, click on [import selected Qbrands]. If you would like to import all Qbrands, click on [import all returned Qbrands]. To remove selected Qbrands, click on [remove all selected Qbrands].

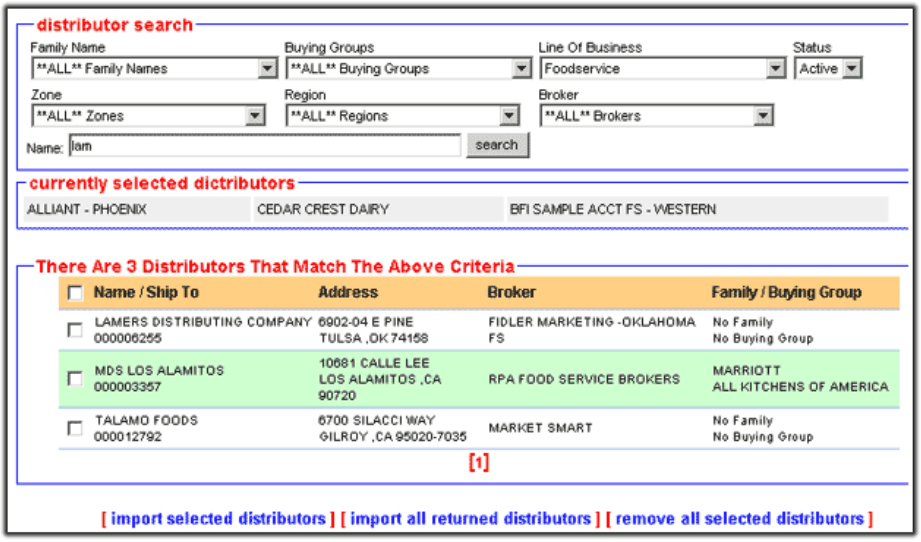

- Functional Area Responsible: Select from the list of Functional Areas.
- Brokers: Click on the [pick from list] link to select brokers for your program. It will open the following screen:

You can search for brokers by zone, region, line of business, status or name. Once you have found the brokers you want to add, select them by checking on the box on the left. (You can select all on a screen by clicking on the box in the orange bar at the top.) You can choose all selected brokers by clicking on the [import selected brokers] link, select all brokers returned by the search by clicking on [import all returned brokers], or remove all selected brokers by clicking on the appropriate link.

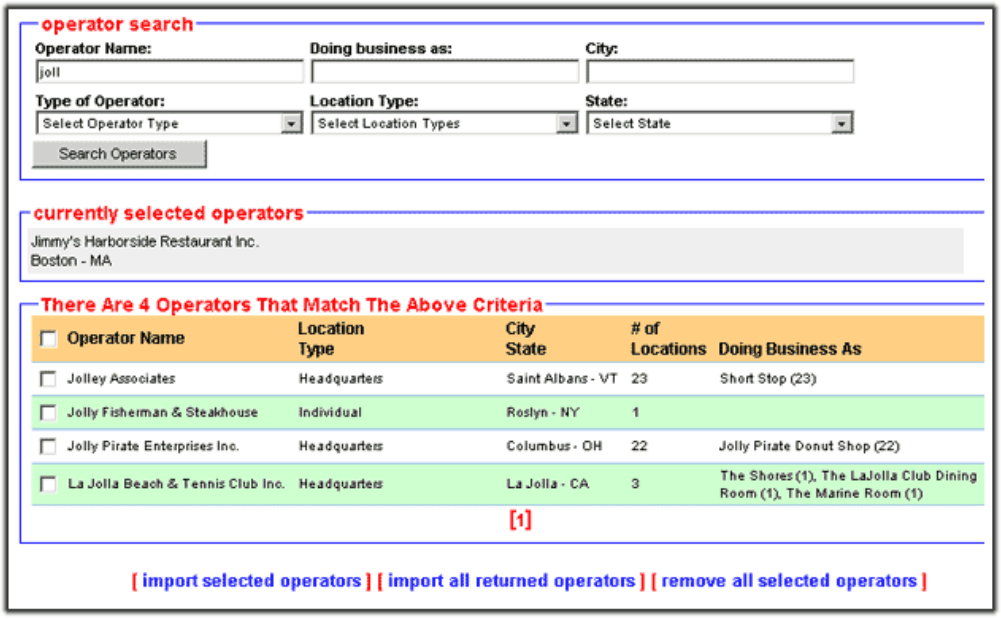

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

- Distributors: As in Qbrands and brokers, clicking on the [pick from list] link will open a new window which will allow you to select distributors:

You can search for distributors by family name, buying groups, line of business, status, zone, region, broker or name. You can select or deselect distributors in the same way you did brokers.

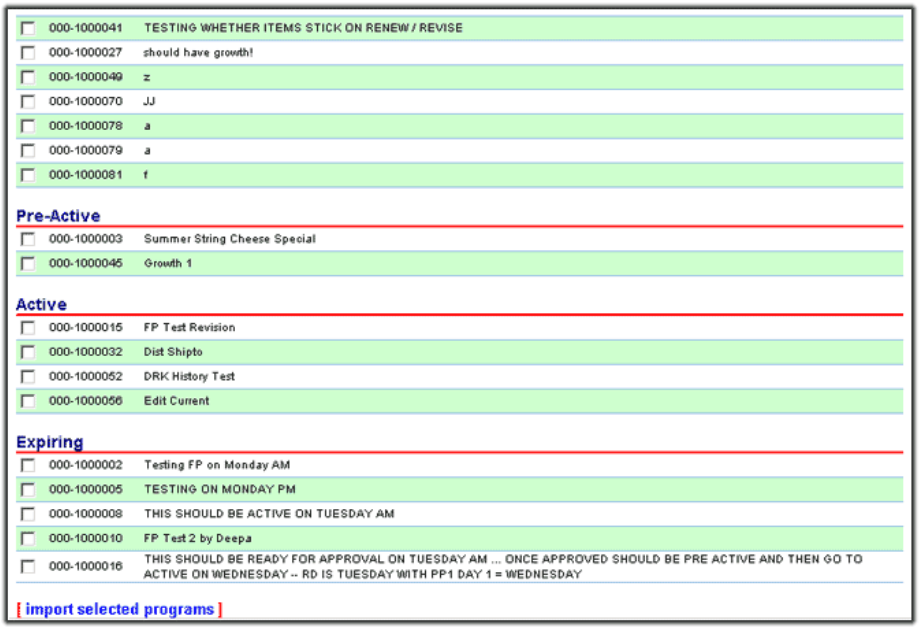

- Operators: Click on [pick from list] to see a list of operators. The following screen will be presented:

Operators can be searched for by operator name, the operator business name, city, type of operator, location type and state.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

- Value Lbs: Select the value in pounds of the project.
- Value $: Enter the dollar value for the project.
- Resources $: You should enter the monetary resources required for this project here.
- Sponsor: Select the sponsor for this project from the list of projects.
- Owner position: Choose the owner position of the program from the available list.
- CER/Acct Number: Enter the number of the account that will be responsible for paying for the project.
- Support: Enter the name of the person or department responsible for supporting this project. This may or may not be the same as the Functional Area Responsible.
- Budget $: The budget available for this project should be entered here.
- Actual $: When you have ascertained the actual cost this program incurred, enter it here.
- Programs associated with this project: To associate a program or programs with the project you are creating or amending, click on the [pick from list] link. The following window will be opened:

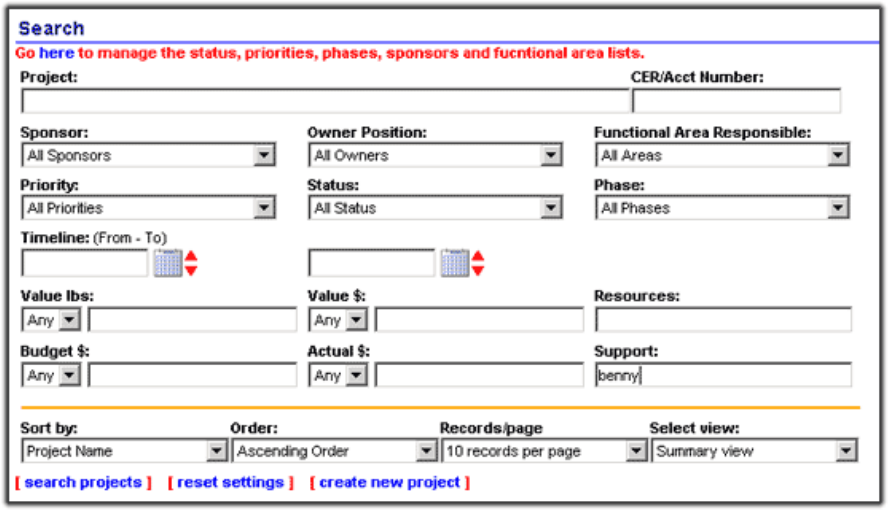

You will be able to view and select all existing Work in Progress, Pre-Active, Active, and Expiring. Click on the box to the left of the project you would like to add, and select [import selected programs].

- Previously saved: If you have previously saved programs, they will be displayed here. You can remove a previously save program by unchecking the box next to the program name.
- Recently selected: The programs you have selected in this session will be displayed in the Recently selected section. If you wish to remove a program, uncheck the box next to the program number.
- Next Step/Updates: You can enter any information about the next steps for the project in this box.

Be sure you select [save data] when you are done entering or amending information. If you do not save the data, everything you entered will be lost.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Search Projects

If you have permission as an administrator, you can click on the link at the top of this screen to add or modify statuses, priorities, phases, sponsors and functional areas.

You can search for a project by the following criteria:

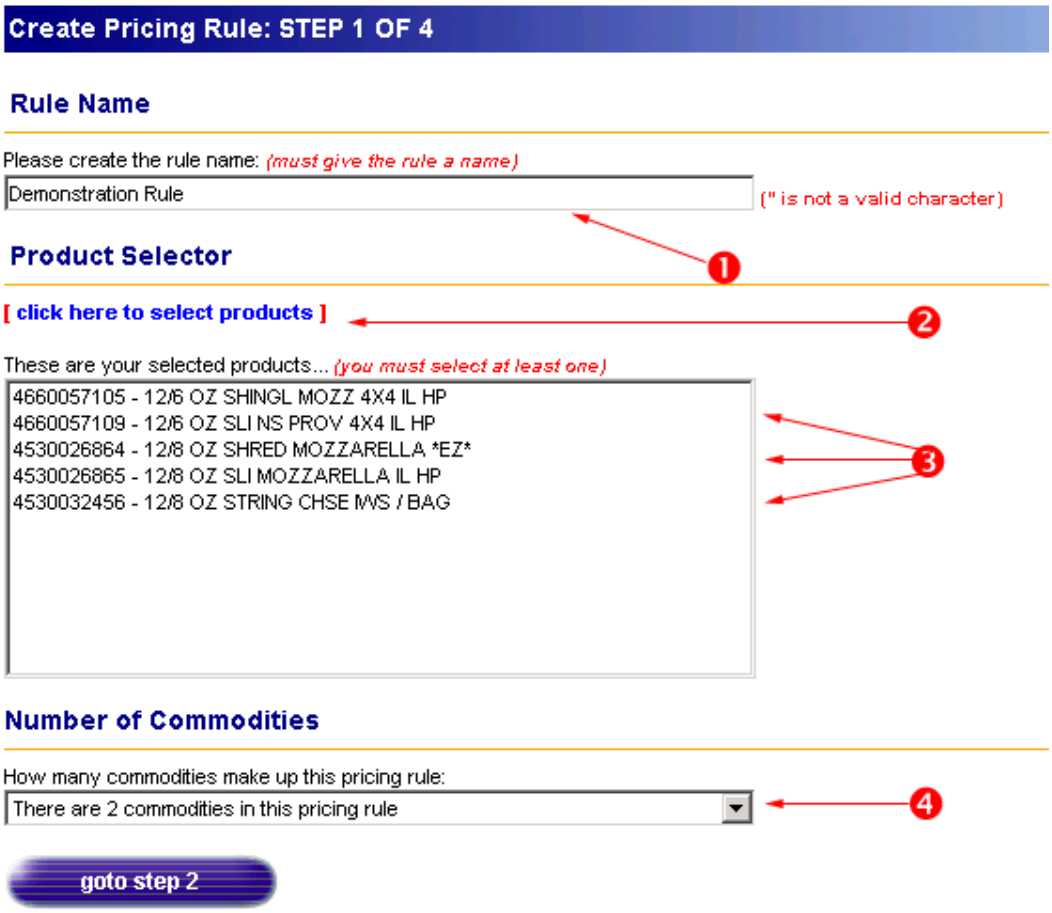

- Project name
- CER/Acct Number
- Sponsor (from list)
- Owner Position (from list)
- Functional Area Responsible (from list)
- Priority (from list)
- Status (from list)
- Phase (from list)
- Beginning date
- End Date
- Value in pounds – you can select whether you would like the value to be equal to (=), less than (>), greater than (<), less than or equal to (>=), greater than or equal to (<=), or not equal to (<>).
- Dollar value
- Resource cost
- Budget
- Actual cost
- Support

If you select more than one criteria, the results shown will need to match both.

You can sort returned results by project, name, order, records per page, and view. The results of your search will be displayed in the summary view with the criteria for the search displayed in the top bar.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

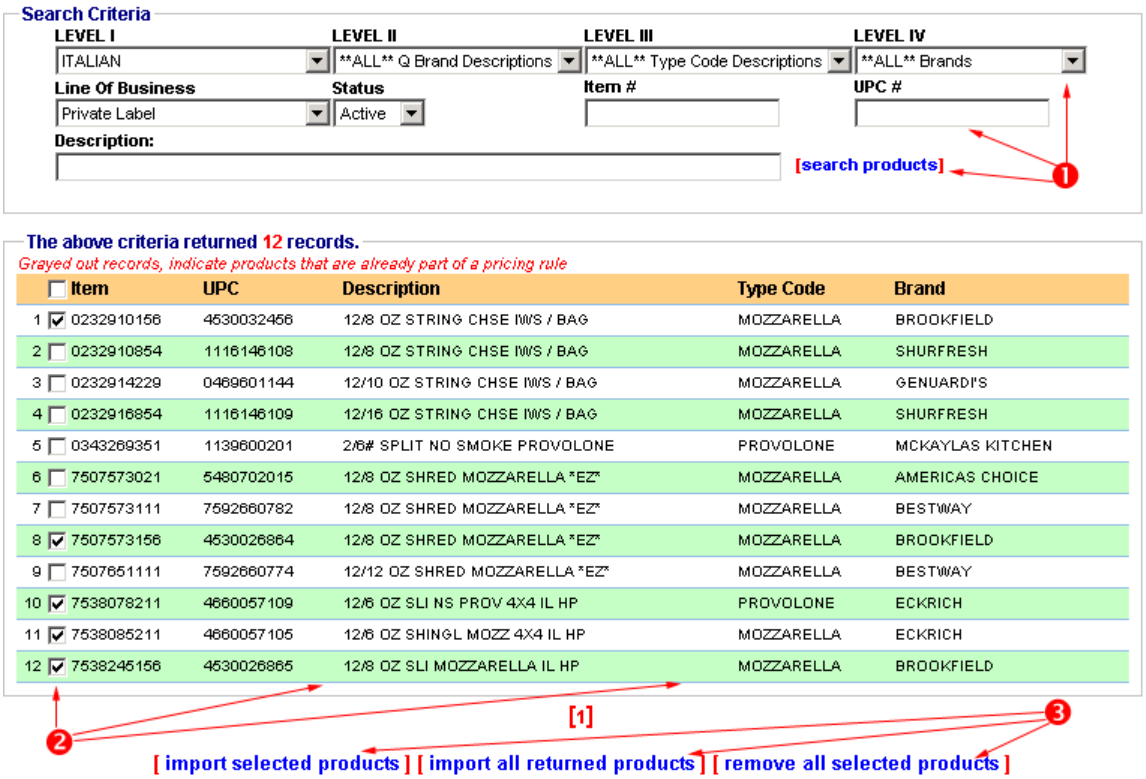

Create a Pricing Rule

1) Rule Name: Enter the name for your rule here. This name is how you can refer to the rule in order to change, modify or delete it.
2) Product Selector – click here to select products: Clicking on this link will open a new page (see #2 below).
3) The products you selected using the pop up window in step two will be displayed here. Double check that these are the products you want to be used in your pricing rule.
4) Number of Commodities: Select the number of commodities that will play a role in your pricing rule. You can choose between 0 and 4 commodities.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Select Product

1) Search Criteria: There are 9 ways to search for a product or products. You can search by: Type Group Descriptions, Q Brand Descriptions, Type Code Descriptions, Brands, Line of Business, Status, Item Number, UPC Number, and Description. If you do not select anything, you will see all products. If you search by more than one criteria, then you will only see products that match both selections. For example, the twelve records returned above are what is shown when "Italian" is selected for the Type Group Description and "Private Label" is selected as the Line of Business. There are 120 records shown when just "Italian" is selected. If only "Private Label" is selected 287 records are displayed. Click on [search products] to see the results of your search once you have made your selections.

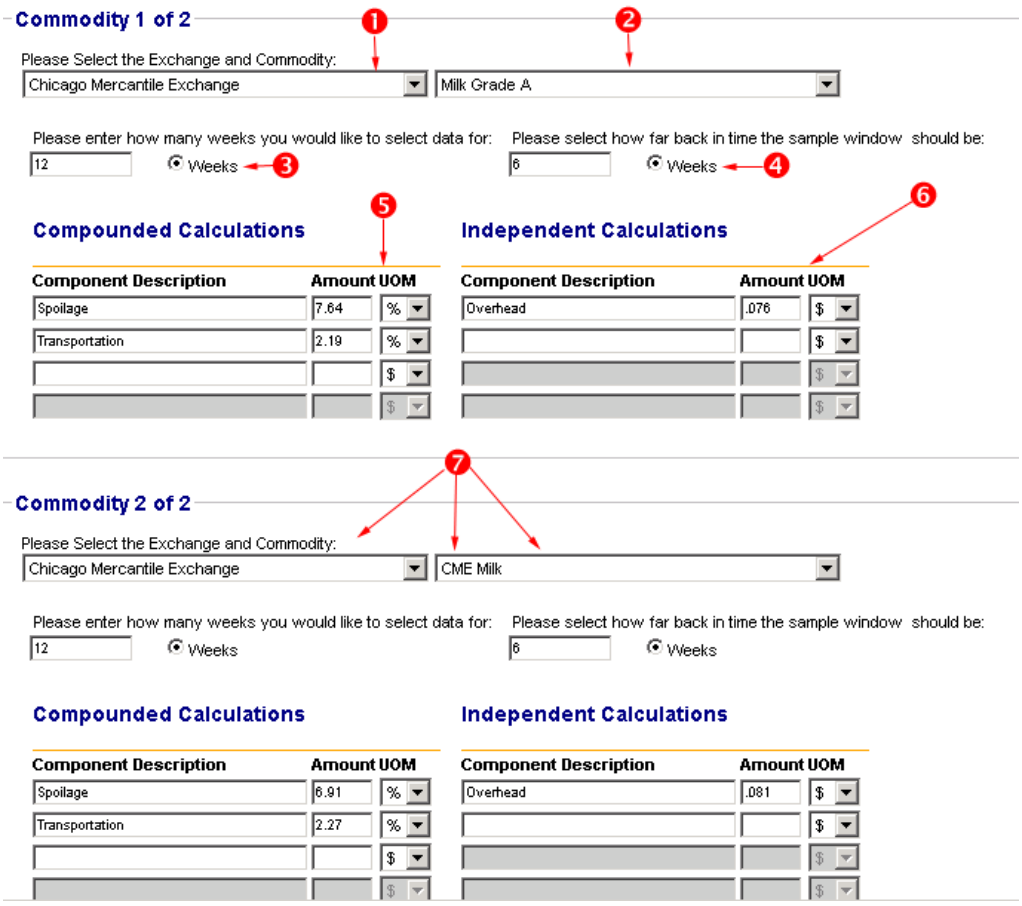

2) Returned Records: Once you have identified the records you are interested in, you need to select them in order to change whether or not they are in your pricing rule. Click on the check box on the left hand side of the screen to select a product. The Item Number, UPC, Description, Type Code and Brand are all displayed to help you make your selection.

3) Once you are satisfied, with your selections, you can do three things. The first is to include all the products you have checked in your pricing rule by clicking on [import selected products]. The second is to import all of the products that are returned by your search by clicking on [import all returned products] (for example, in this case clicking on [import all returned products] would make all 12 returned products part of the pricing solution). Finally, you can remove products from your pricing rule by checking them and clicking [remove all selected products].

NOTE: If a product is grayed out, you cannot select it to be added to your pricing rule. It is already a part of another pricing rule.

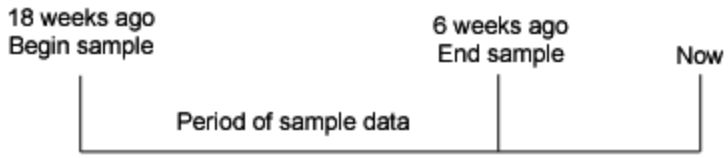

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Select Commodities

1) Please Select the Exchange and Commodity: Select the exchange which deals with the commodity you are interested in adding to the pricing rule. What you select for an exchange will change what will be available for you to select in the commodity list. For example, selecting the Chicago Mercantile Exchange will provide a commodity list including Milk Grade A, Butter, and Feeding Cattle. If you select the Minneapolis Grain Exchange, commodity options include white wheat, cottonseed, and durum wheat.
2) Once you have selected the appropriate exchange on the left, you can choose the commodity you are selecting from the pull-down menu on the right.
3) Please enter how many weeks you would like to select data for: This allows you to choose the sample size you wish to have analyzed to create the price rule. If you would like a 12 week period analyzed, enter 12 here.
4) Please select how far back in time the sample window should be: The number of weeks entered here indicates how many weeks ago the sample should be taken. If you were to enter 6 weeks for this, then the data that would be used in evaluating the pricing rule would be 12 weeks worth of data, starting 18 weeks ago and ending 6 weeks ago.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

5) Compounded Calculations: Compound calculations are dependent upon each other. For example, if a commodity price is $10, and the first component of the calculation is 10%, then the price for that component is $1. The second component might have a calculation of 10% as well, but the price for it is $1.10 – it is 10% of the commodity $1 and 10% of the $1 that the first calculation added. The total price for these two components would be $2.10.

   Compounded Calculation #1:

   $10 x 10% = $1

   Compounded Calculation #2:

   ($10 + $1) x 10% = $1.10

   Total Additional Cost from Compounded Calculations:

   $1 + $1.10 = $2.10

6) Independent Calculations: Independent calculations are separate from each other. If the commodity price being modified is $10 and the first component of the calculation is 10%, then the cost for that component is $1. If the second component is also 10% the cost for the component is $1. The total price for these two components would be $2.

   Independent Calculation #1:

   $10 x 10% = $1

   Independent Calculation #2:

   $10 x 10% = $1

   Total Additional Cost from Independent Calculations:

   $1 + $1 = $2

7) Steps 1-6 are repeated for each commodity you selected.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Final Adjustments

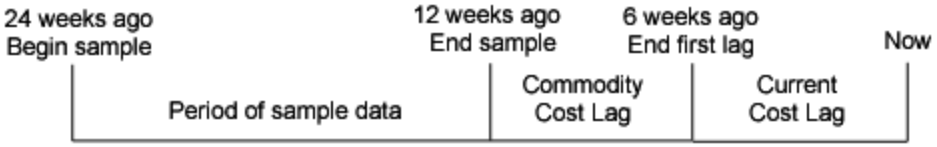

1) Selected Options: The selected options pane shows you the entries you have made to date. You can see the name of your rule. Clicking on the "View/Hide Products" link will show the products if they are not visible, and hide the products you selected if they are shown. You can change the values shown by clicking on [revise these values].

2) Commodity Pricing Weight: Here you can enter the percentage of the pricing rule the commodity comprises. For example, your price rule might use 70% Milk Grade and 27% CME Milk. The total of all the percentages for the commodities you are creating the price rule around must equal 100%.

3) Current Cost Lag: This indicates the number of weeks in the past you want information generated for. If you were to enter 6 here, then it would begin calculations from 6 weeks back. In our example, we already have a 6 week lag, and a 12 week period specified. Entering 6 for the current cost lag would produce information about a 12 week period that occurred beginning 24 weeks ago and ending 12 weeks ago (6 weeks for the current cost lag and 6 weeks for the lag entered in 3.4).

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

4) Final Adjustments – Compounded Calculations: The compounded calculations used here work in exactly the same manner they did on the previous page. The difference is that at this point you can run the same calculation on the final cost – not just on the different commodities. Please note that these calculations are on top of the calculations already made on a commodity basis. So if you take the previous example where the commodity price was $10, the cost of compounded calculations was $2.10 and the cost of independent calculations was $2, then the beginning cost used in these calculations will be $14.10.

   Compounded Calculation #1:

   $14.10 x 10% = $1.41

   Compounded Calculation #2:

   ($14.10 + $1.41) x 10% = $1.551

   Total Additional Cost from Compounded Calculations:

   $1.41 + $1.551 = $2.961

5) Final Adjustments – Independent Calculations: These calculations work the same as on the earlier screen, except with beginning price difference noted above.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

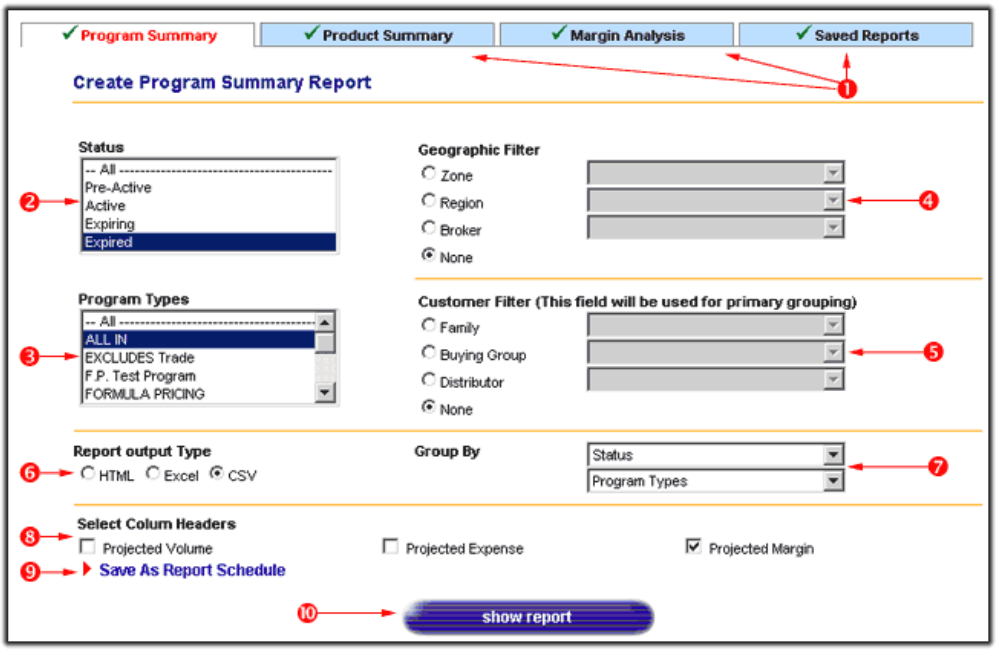

Select Commodities

1) Selected Options: Review the information you entered here. Clicking on "View/Hide Products" will display your product list if it is currently not shown, and hide it if it is currently shown.
2) You can change any of the information displayed here by clicking on [revise these values].
3) Commodity Formula Cost (including lag): This shows the commodity formula cost including the lag you indicated on the previous page.
4) Commodity Formula Cost (as of today): This shows the commodity formula cost calculated from today. This number is the result of all the information you have entered, and will be used to calculate the margin for a program. To save this formula and make it available to others to use in creating programs, click on "save the data". You will now be able to see your pricing rule when creating a new program.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Report Writer - Program Summary

1) There are three different types of reports that can be generated: Program Summary Reports, Product Summary Reports, and Margin Analysis Reports.

2) Status: You can create a report that only displays programs of a certain status. If you wish to select multiple statuses, hold down the CTRL key as you make your selections. If you wish to select all statuses, choose the "All" option.

3) Program Types: You can create a report that only displays programs of a certain program type. If you wish to select multiple program types, hold down the CTRL key as you make your selections. If you wish to select all program types, choose the "All" option.

4) Geographic Filter: You can select one geographic filter. You must select whether this filter is by zone, by region or by broker. If make a selection in zone, you cannot select by region or broker, and programs which have no zone will not appear in the results. If you choose to filter by geography or customer, you cannot select column headings (#8).

5) Customer Filter: You can select one customer filter. You must select whether this filter is by family, buying group or distributor. If make a selection in buying group, you cannot select a filter by family or distributor, and programs which have no buying group will not appear in the results.

6) Report type: You can choose to have this report generate an html page, an Excel document or a CSV (comma delimited file). If you choose HTML, a window will appear with the information. If you select Excel or CSV, you will be asked whether you would like the save the file or view it.

7) Group by: Results of your survey can be grouped either primarily by Status and secondarily by Program Type, primarily by Program Type and secondarily by Status, only by one or the other, or by neither.

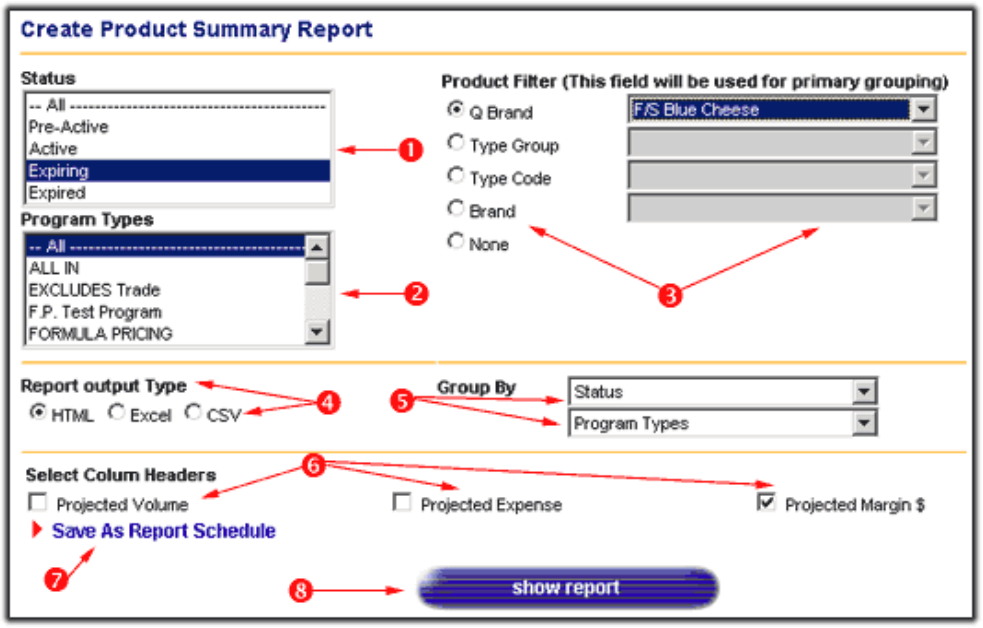

8) Select Column Headers: If you are not filtering by customer or by geography, you may select column headers by projected volume, projected expense or projected margin. That information will appear when you generate the report.

9) Save As Report Schedule: If you would like to save the report, click here

10) Show Report: Once you are finished crafting your report, click here to view it. Showing the report does not save it or schedule it.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

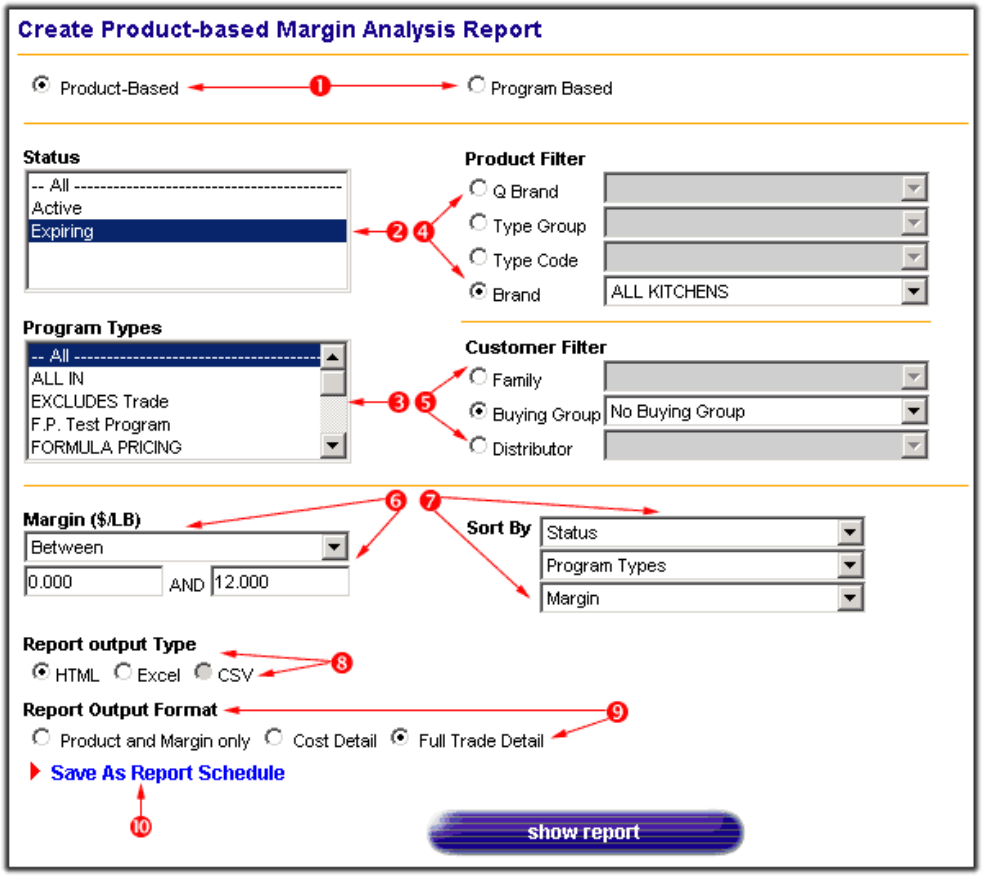

Product Summary

1) Status: You can create a report that only displays programs of a certain status. If you wish to select multiple statuses, hold down the CTRL key as you make your selections. If you wish to select all statuses, choose the "All" option.
2) Program Types: You can create a report that only displays programs of a certain program type. If you wish to select multiple program types, hold down the CTRL key as you make your selections. If you wish to select all program types, choose the "All" option.
3) Product Filter: Results for the report can be filtered by one of the following: Q Brand, Type Group, Type Code or Brand. You can also choose not to filter by any of these by selecting None. You cannot select a column heading (#6) unless you have chosen a product filter.
4) Report type: You can choose to have this report generate an html page, an Excel document or a CSV (comma delimited file).
5) Group By: Select whether you would like the report grouped by Status, then Program Type, by Program Type then Status, or by only one of the options.
6) Select Column Headers: If you are not filtering by customer or by geography, you may select column headers by projected volume, projected expense or projected margin. That information will appear when you generate the report.
7) Save As Report Schedule: If you would like to save the report, click here.
8) Show Report: Once you are finished crafting your report, click here to view it. Showing the report does not save it or schedule it.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Margin Analysis

1) Select whether you would like your margin report to be based on the margins for a product, or for a program.
2) Status: You can create a report that only displays programs of a certain status. If you wish to select multiple statuses, hold down the CTRL key as you make your selections. If you wish to select all statuses, choose the "All" option.
3) Program Types: You can create a report that only displays programs of a certain program type. If you wish to select multiple program types, hold down the CTRL key as you make your selections. If you wish to select all program types, choose the "All" option.
4) Product Filter: Results for the report can be filtered by one of the following: Q Brand, Type Group, Type Code or Brand. You must select one to filter by.
5) Customer Filter. Report results must be filtered by Family, Buying Group or Distributor.
6) Margin: You may choose to return results for margins using different parameters:
    - All: Shows you all margins
    - Between: When you select between, you are given two parameters to enter – the low parameter and the high parameter. The report will return margins between those two parameters.
    - Greater Than or Equal To: You can select all margins greater than or equal to an amount you enter.
    - Less Than or Equal To: You can select all margins less than or equal to an amount you enter.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

7) Sort by: For margin reports you can select the order the three pieces of information (Status, Program Type, and Margin) will be sorted by.

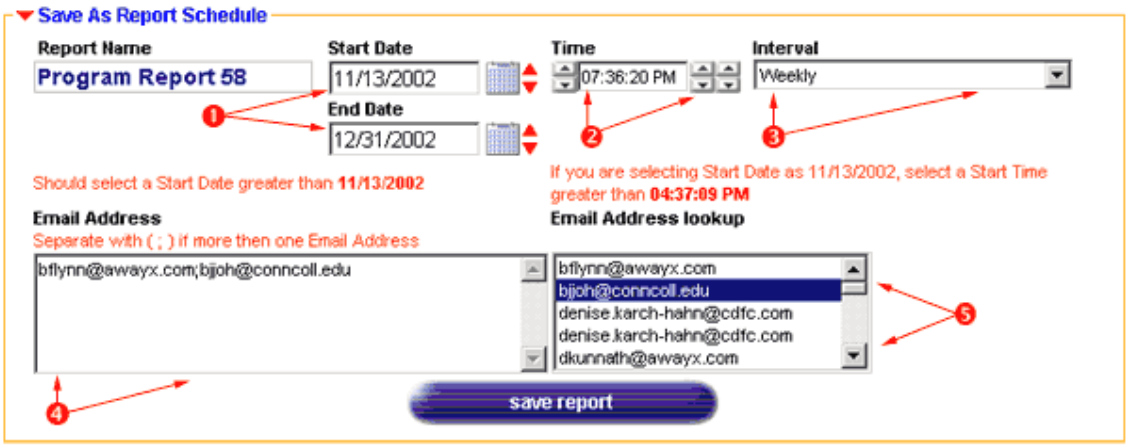

8) Report Output Type: You can choose to have this report generate an html page, an Excel document or a CSV (comma delimited file).

9) Report Output Format: Select what information you would like to be included in your report. You can select Product and Margin Only, Cost Detail, and Full Trade Detail.

10) Save As Report Schedule: If you would like to save the report, click here.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Saving and Scheduling a Report:

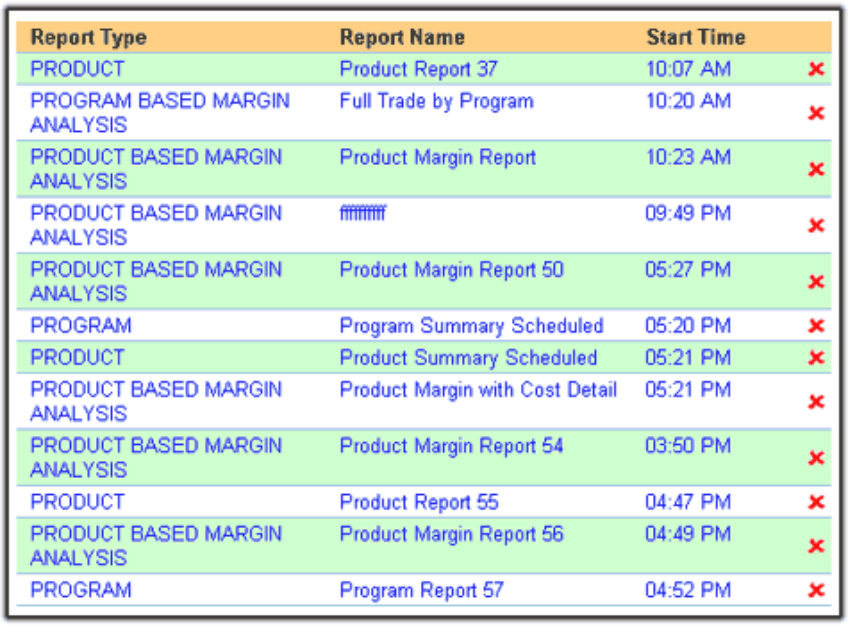

You can schedule reports to be emailed to specified users on a regular basis.

1) If you wish to save a report as a scheduled event, you can establish the start dates and end dates the program should run from and to. You may either type in the dates, click on the calendar icon to see a calendar to help you select the dates, or use the red up and down arrows to increment or decrement the dates by one day.
2) *Time:* Select the time you would like the report to run. The arrows to the left of the box change the hour. The inner set of arrows on the right change the minute, and the arrows to the far left change whether the time shown is AM or PM.
3) *Interval:* Select the frequency with which you would like the report to run. Options are: Once, Daily, Weekly, Monthly.
4) *Email Address:* The email addresses to whom the saved reports should be sent. Multiple email addresses should be separated with semi-colons.
5) You can select email recipients from a list of registered recipients in the application. To select, find the email address and click on it. You will notice that it has been automatically added to the Email Address field.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

When you click on the "Saved Reports" option you are presented with this screen. These are the reports that have been saved and are scheduled to run on a regular basis. If you click on any part of the blue text, you will be able to revise the report. (To revise multiple reports there are arrows that take you to the next or previous report.) Clicking on the red X will delete the report.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

The information presented in the report depends very much on the selections you made. In the above example of a Product Summary Report you can see the Type Group in the top level in goldenrod. The Status is shown in green. The Program Type is shown in red. The programs themselves are displayed in white. This report also shows the projected margin. The information shown and the order it is shown in will depend on your selections.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Administration Console – Project Administration

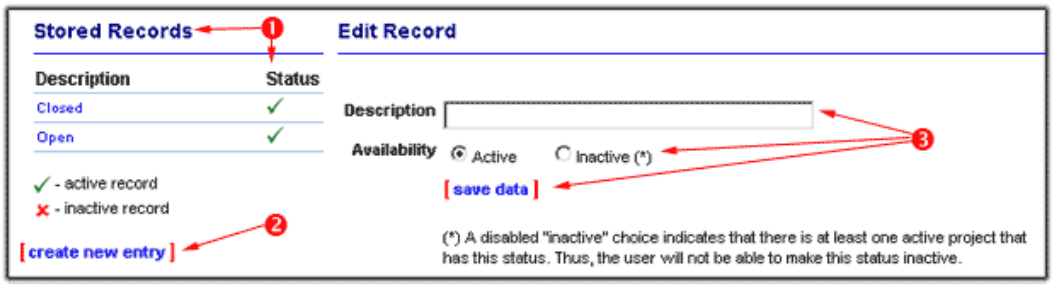

Menu

To modify general projects options, go to the settings -> Administration. If you do not see options under "Projects" click on the word or on the arrow next to it. You can modify the options in five different areas:

- Status
- Priorities
- Phases
- Functional areas
- Sponsors

Status

1) *Stored Records:* You can view the status types that already exist on the left hand side, and whether the status type (the stored record) is active or inactive. An active record will be available for project creation, an inactive record will not. If you wish to edit a record, click on the description. The information will then appear in the text field on the right side.

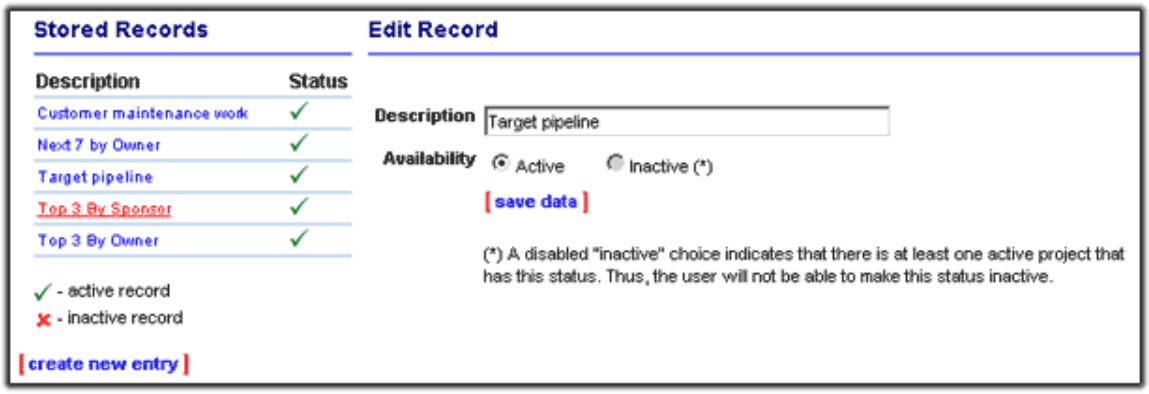

2) *Create New Entry:* If you want to add a new entry to the available records, click on the [create new entry] link. When you enter information in the fields to the right and click on [save data] a new entry will be created.

3) Whether you create a new entry or are editing an existing one, enter the information for the new status in the text box marked "Description" and select what availability you would like the status type to have, active or inactive, by selecting the option next to availability. When you are satisfied with your changes, click on the [save data] link. Your changes will not be registered unless you save the data.

If you cannot select "inactive" as an option because it is disabled (grayed out) that is because there is at least one active project with the status.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Priorities

You can see a list of existing priorities under the heading "Stored Records". As in statuses, clicking on the description of a priority will allow you to edit it to the right. To create a new priority, click on the [create new entry] link, enter the information to the right, and click on [save data].

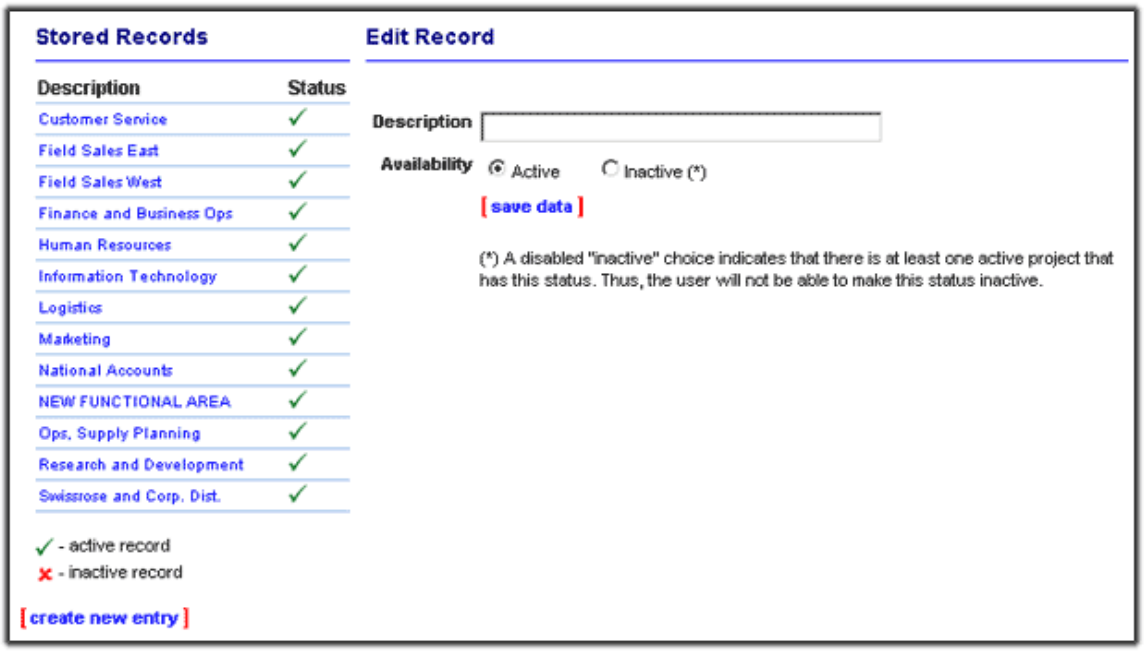

Phases

A listing of existing phases is shown on the left hand side. If you wish to edit one of the stored records, click on the description. Information will appear on the right hand side, which you can then edit. Click on [save data] to save your changes. If you wish to create a new phase, click on [create new entry], enter the data for the new entry on the right, and click on [save data].

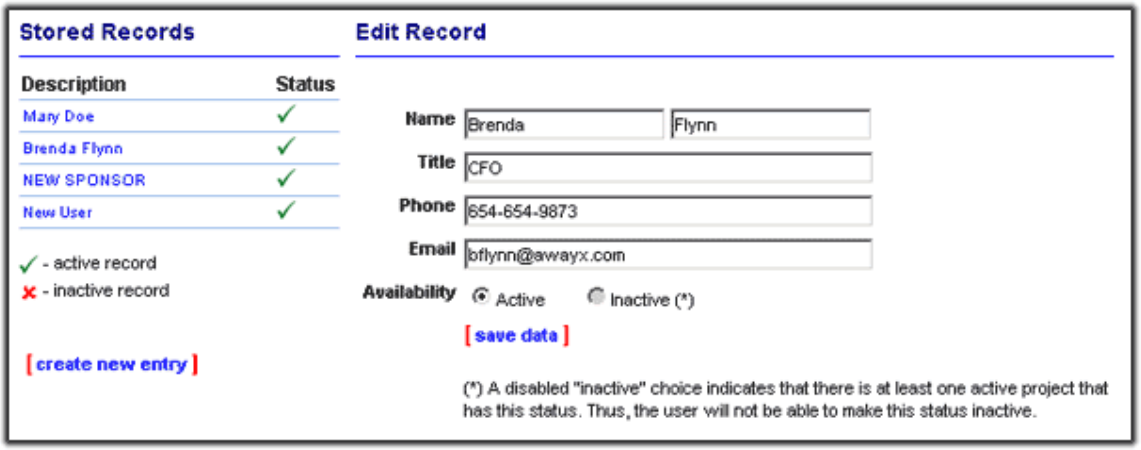

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Functional Areas

All functional areas available to projects are listed on the left side of the screen. If you would like to edit a functional area, click on its description. You can then edit the description and availability on the right side, and save your changes by clicking [save data]. You can create a new entry by clicking on the [create new entry] link, entering the information in the field on the right, and clicking [save data].

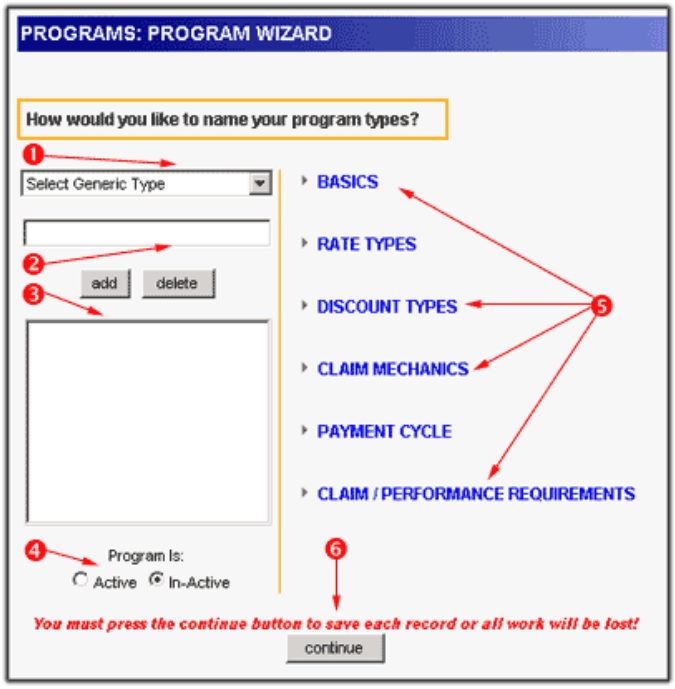

Sponsors

Like the other areas, you can see existing sponsors on the left side of the screen and edit their information on the right. The amount of information is different, however. You will be asked to provide a name (first and last name), a title, phone number, email address and availability for a sponsor. You must create at least a first and last name for the record to be saved. If you do not enter a first and last name, you will not get an error message, but the user you are creating will not be saved when you click [save data].

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Program Wizard

1) Select a Generic Type that you would like your new program to be a part of. As of this writing, the Generic Type options are: Operator-Deviated Pricing, Distributor Trade/Shelter, Operator Direct or HQ Programs, and Field Execution. You must select a Generic Type. The Generic Type does not limit the choices available to you, but help organize the program type you are creating.

2) Once you have selected a generic type, if you wish to create a new program, enter the name of the program into this box and click "add". When you add a new program, you will no longer see the other programs in the Generic type.

3) If you would like to edit an existing program type in the generic type you have selected, click on its name in the lower box. It must be marked as "In-Active" in order for you to be able to edit it. Existing program types can be deleted by click on them, and choosing the "delete" option.

4) Mark whether the program you are creating or editing is Active or In-Active. If it is Active, it will be available for users to begin creating programs with. If it is In-Active, you can continue to modify it.

5) There are six areas of settings you can modify for a program:

   - Basics
   - Rate Types
   - Discount
   - Claim Mechanics
   - Payment Cycle
   - Claim/Performance Requirements

Click on the green arrow or the blue heading to view the options for that section.

6) If you do not click on "continue" your work for this program will not be saved. If you are not done with your program template, mark it as In-Active and click continue.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Basics

1) Note field: Enter notes on the program type you are creating. These simply describe the program type.

2) Select whether the program type will include or exclude trade.

   Duration Maximum: Check the box to include a maximum duration. If you choose to include a duration maximum, enter the maximum number of days in the field to the right.

   Duration Minimum: If you would like your program type to have a minimum duration, check the box and enter the number of days for the minimum duration in the box to the right.

   Global Volume Maximum: If you wish to create a maximum global volume value, check the box next to Global Volume Maximum. You can then set maximum values by case, by pound, or set values for both.

   Global Volume Minimum: You can create a Global Minimum Value by checking the box next to Global Value Minimum. You can set the Global Value Minimum in either cases, pounds, or set value for both.

   Allow Retroactive: If programs created in this program type should be allowed to be retroactive, check the box. If there is a maximum duration for how far in the past they should be retroactive to, enter that value in days in the box to the right.

   Advanced Spending: If checked, advanced spending will allow for payment at the beginning of a program.

   Controllable Flag: Indicates whether a program's success depends on internal (check controllable) staff, or on external forces such as brokers (do not select controllable).

   Specify Distributors: If the program type you are creating should include a screen that allows program creators to specify distributors, select the box.

   Specify Operators: If the program type you are creating should include a screen that allows program creators to specify operators, check the box.

   Specify Brokers: To allow the program type to specify brokers, click on the box.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Rate Types

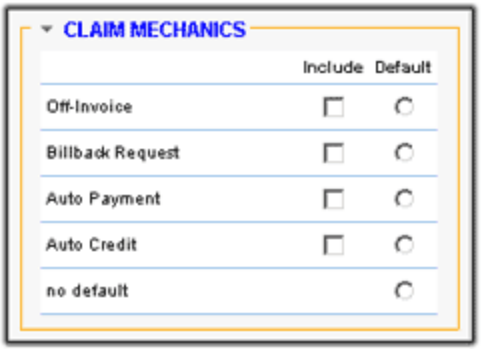

Rate types allow you to establish what rate types are permissible for the program type you are creating, and what the default rate type should be. You need to select at least one rate type to include (click on the include box for either "Per pound" or "Per Case"). If you have chosen to include both options, you can either set one as a default so the program can use both per pound and per case, but per case, for example, is automatically selected, or choose that the program have no default, in which case the user will need to make a selection before proceeding in their program creation.

Discount

The discount types shown here represent a set of options available to the program type. The discount types as of this writing are: Fixed Price, Rebates, Lump Sums, Growth and Formula pricing. By selecting the "Include" box next to each discount type, you are making it available to the program type you are creating. You must select at least one discount type.

Claim Mechanics

You can select which claim mechanics will be available to the program type you are creating. To include a claim mechanic, click on the include box next to the mechanic name. You must select at least one claim mechanic. If you select multiple claim mechanics, but would like one of them to be the default value for the program type, select the circle to the right of the box. You may only select one default. If you do not want a default claim mechanic, select "no default".

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Payment Cycle

Payment cycles available to the program type you are creating can be set here. You can select which to include (you must include at least one), and which of those you have selected should be the default value for the program. If you do not wish to set a default value, select "no default".

Claim/Performance Requirements

The claim/performance requirements above represent a set of options available to the program type. The claim/performance requirement options as of this writing are: Invoice/Billback, Claim Period, Item #s w/Quantity and Rates, Total Dollars and Pounds, Menu Listing, Branded Point of Sale, Mandated Specification, Optional Specification. By selecting the "Include" box next to each claim/performance requirement, you are making it available to the program type you are creating. You must select at least one requirement type.

Expiring Age

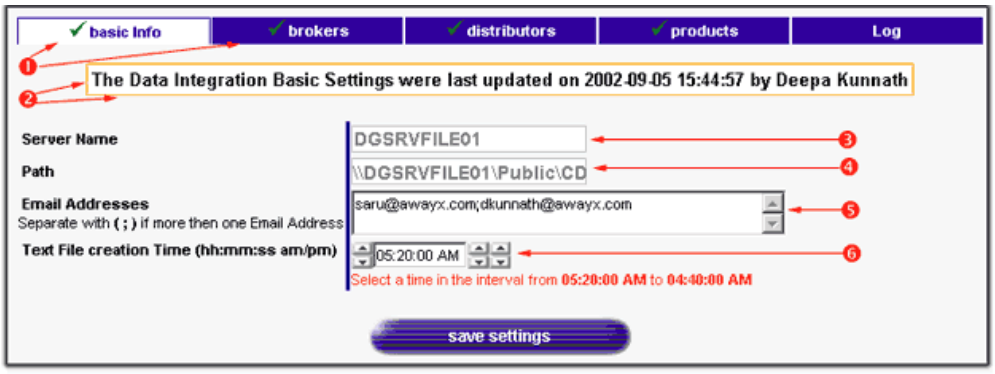

You can set the number of weeks before a programs end date that it will be considered to be expiring. In this example, 8 weeks before the end date of a program, it will be moved from having an Active status to having an Expiring status.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Data Integration

Basic Info

1) The navigation at the top of the screen allows you to manage all the internal data feeds.

   Basic Info: Manage basic information about all the data feeds.

   Brokers: Data feeds that supply broker information

   Distributors: Data that supplies distributor information

   Products: Information about products

   Log: The logs keep a record of any failures in the data feed, allow you to view the failures, and create a text file about the failures.

2) The person who most recently changed the basic settings, and the date and time on which they did so are recorded at the top of the screen.

3) Server Name: The file server to which the data feeds are sent. This information is displayed for your reference only – you cannot edit it.

4) Path: The directory path to which the files are sent. This information cannot be changed.

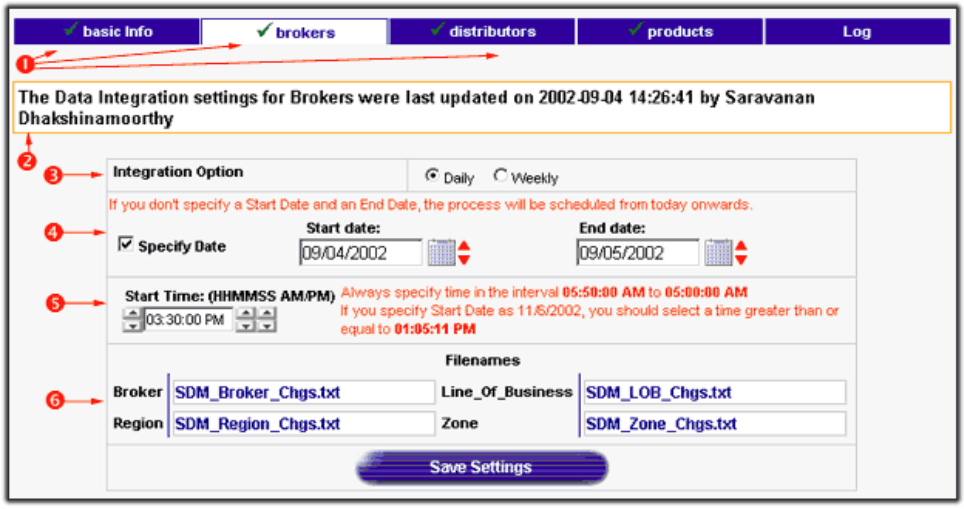

5) Email Addresses: The email addresses to which notifications should be sent. Multiple addresses should be separated by semi-colons. You can edit or change this information.

6) Text File creation Time: Select the time the file should be created. There is an available interval listed in red. For example, if it says "Select a time in the interval from 05:20:00 AM to 04:40:00 AM" you can select any time in a 23 hour 20 minute period. The only period you must avoid is between 4:40 AM and 5:20 AM. That time is reserved for another process.

When you are satisfied with you choices, click on "Save Settings". Settings will not be saved unless you save. If you go to another screen without saving, your settings will be lost.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Brokers

1) You can navigate to different areas of the Data Integration administration by clicking on the tabs at the top of the screen.

2) Information on who made the latest changes to the brokers, and when those changes were made is available at the top of the screen.

3) Integration Option: Select whether you would like the data integration to be a daily or weekly process. If you select daily, you see the screen as above. If you select weekly, you are asked to additionally select which day of the week the operation should take place.

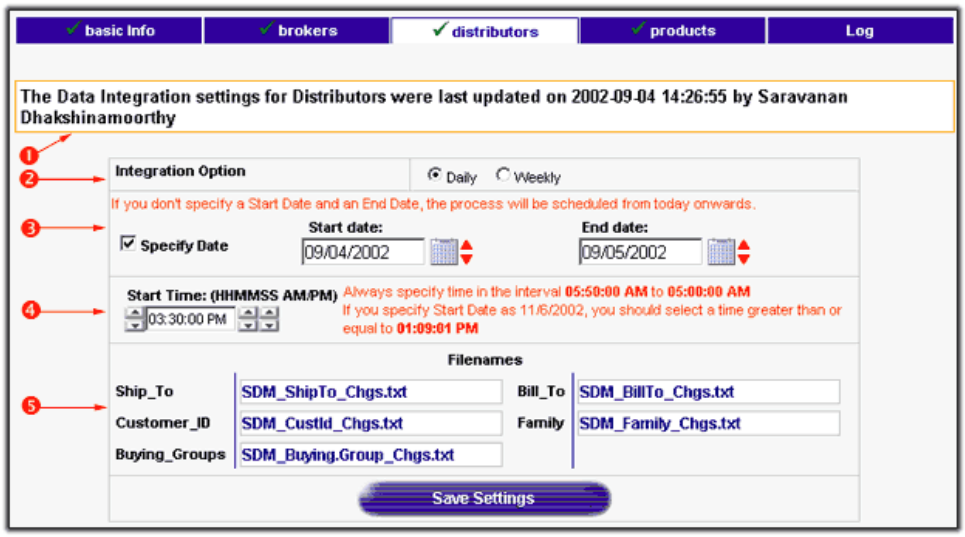

4) Specify Date: You can specify a start date and end date for the data integration. If, for example, you want the process to run only for the month of December, you could choose 12/01/2002 as your start date and 12/31/2002 as your end date. If you wish to have the data integration be an ongoing process with no start or end date, simply leave the fields blank.

5) Start Time: Enter the time of day the process should take place. The red text next to the start time will specify the available window. If it says "Always specify time in the interval 05:50:00 to 05:00:00 AM" then you have a window of 23 hours and 10 minutes to specify the operation should run. You will also see text asking you to create a start time so that if the start date you selected is the current date, the process will run at least one hour in the future from the current time.

6) Filenames: The names of the files that will be imported to create the broker information is shown here. You can change the name of the file to be imported. Be sure you know the exact name of the file, and enter it precisely. You cannot add or remove files from the data integration process through this console.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Distributors

1) Information on who made the latest changes to the brokers, and when those changes were made is available at the top of the screen.

2) Integration Option: Select whether you would like the data integration to be a daily or weekly process. If you select daily, you see the screen as above. If you select weekly, you are asked to additionally select which day of the week the operation should take place.

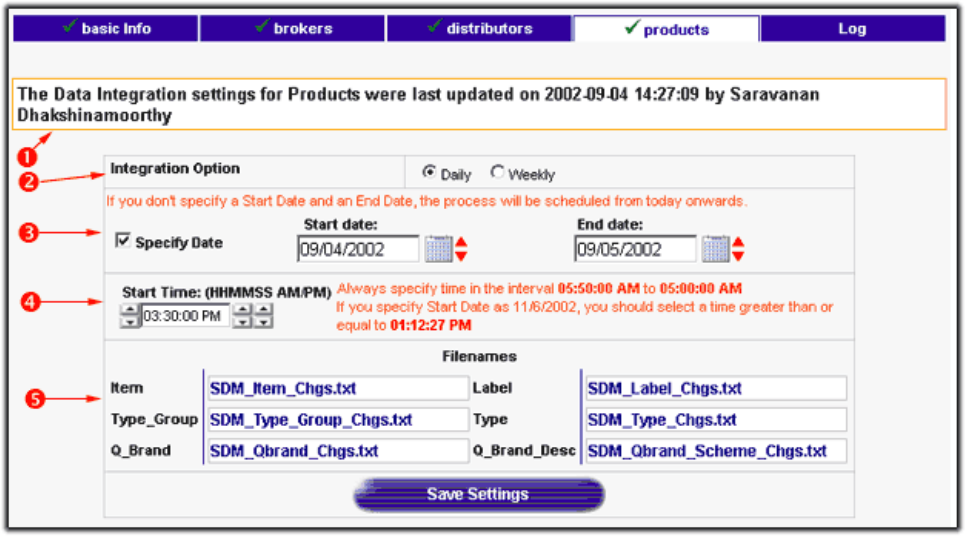

3) Specify Date: You can specify a start date and end date for the data integration. If, for example, you want the process to run only for the month of December, you could choose 12/01/2002 as your start date and 12/31/2002 as your end date. If you wish to have the data integration be an ongoing process with no start or end date, simply leave the fields blank.

4) Start Time: Enter the time of day the process should take place. The red text next to the start time will specify the available window. If it says "Always specify time in the interval 05:50:00 to 05:00:00 AM" then you have a window of 23 hours and 10 minutes to specify the operation should run. You will also see text asking you to create a start time so that if the start date you selected is the current date, the process will run at least one hour in the future from the current time.

5) Filenames: The five files that provide information for the Distributors are shown here. You can change the names of the files.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Products

1) Information on who made the latest changes to the brokers, and when those changes were made is available at the top of the screen.

2) Integration Option: Select whether you would like the data integration to be a daily or weekly process. If you select daily, you see the screen as above. If you select weekly, you are asked to additionally select which day of the week the operation should take place.

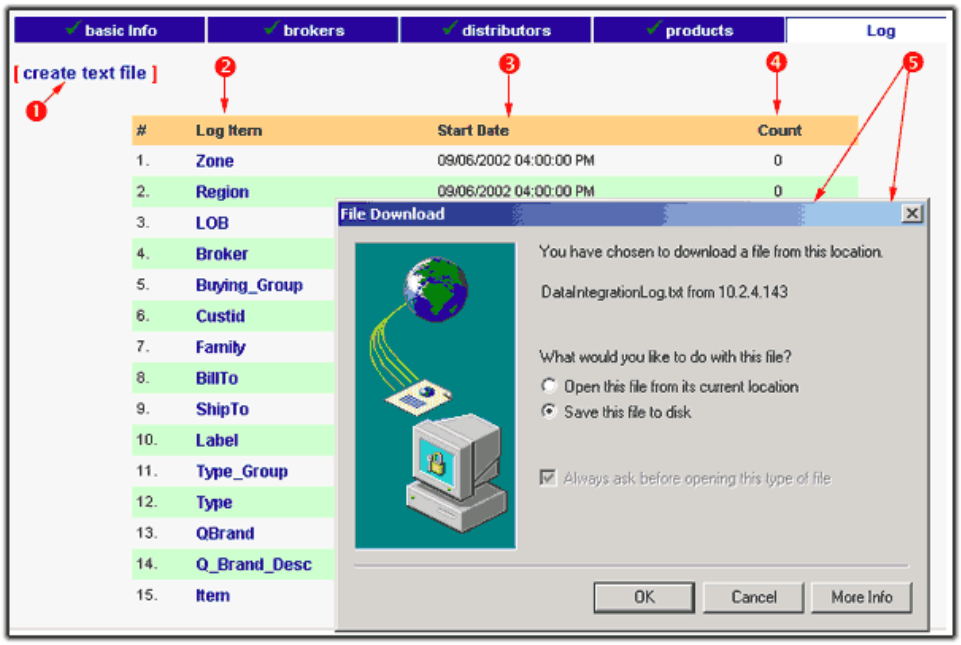

3) Specify Date: You can specify a start date and end date for the data integration. If, for example, you want the process to run only for the month of December, you could choose 12/01/2002 as your start date and 12/31/2002 as your end date. If you wish to have the data integration be an ongoing process with no start or end date, simply leave the fields blank.

4) Start Time: Enter the time of day the process should take place. The red text next to the start time will specify the available window. If it says "Always specify time in the interval 05:50:00 to 05:00:00 AM" then you have a window of 23 hours and 10 minutes to specify the operation should run. You will also see text asking you to create a start time so that if the start date you selected is the current date, the process will run at least one hour in the future from the current time.

5) Filenames: The six files that provide information for the Products are shown here. You can change the names of the files.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Logs

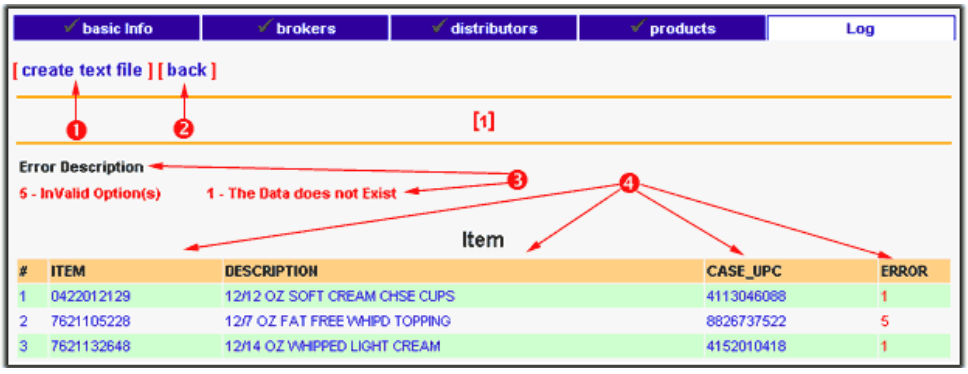

1) If you want to create a text file of all the recorded errors, click on [create text file]. You will then be shown the information in the dialogue box shown by number 5. You may then save this file wherever you choose, and refer to it as you find necessary.

2) Log Name: The name of the log. If there are any errors, the name becomes a link you can click on to view details about the errors.

3) Start date: The date that the import began being run on.

4) Count: The number of errors recorded for a particular data import. It will also become a link to details if there are any errors.

If you click on a link, you will see the following page:

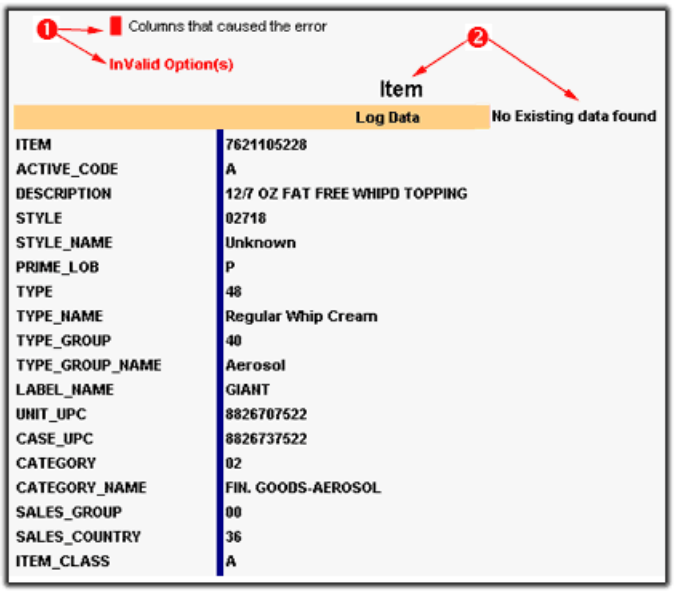

1) Clicking on [create text file] will create a text file the item you selected.

2) You can return to the previous page by clicking on [back]

3) A brief description of what the error numbers mean for the errors returned to you is provided here.

4) The item number, description, case_upc and error number are displayed. You can click on the text to see details about the error.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

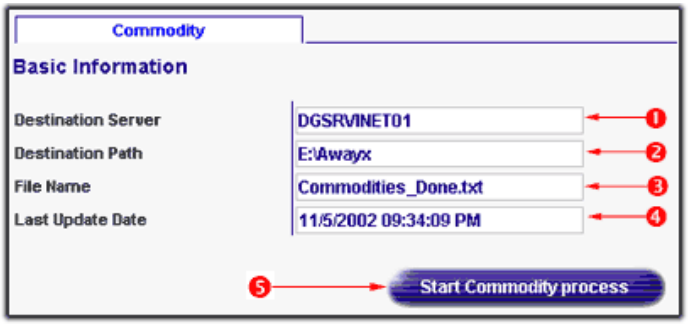

1) Information about the problem that caused the error is shown in red.

2) Details about the item involved in the problem are shown. In this case, the error is created because there is no existing data, so the existing data is not available to be shown.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

AwayX Data Integration

Commodities

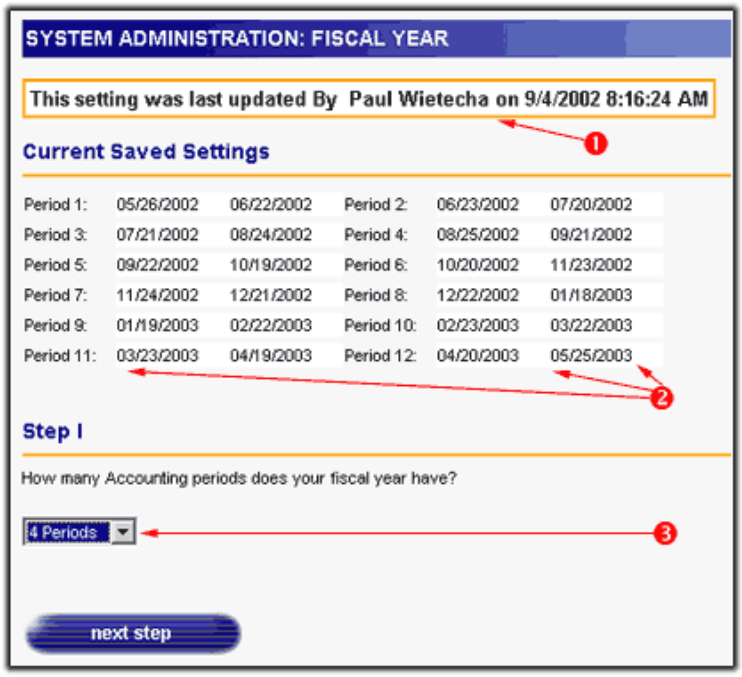

The only information currently being transmitted from AwayX is Commodity data.

1) Destination Server: The current destination server. This information is for reference only, and cannot be modified through this screen.
2) Destination Path: The location to which files will be transferred on the destination server. This information cannot be modified in this console.
3) File Name: The name of the file being transferred. This information cannot be modified.
4) Last Update Date: The most recent date the information transfer occurred.
5) Click on the "Start Commodity Process" to integrate the data manually. Clicking on this is not usually necessary – the commodity integration process is scheduled. The option should only be used when the process encountered a problem, of if an update needs to occur between scheduled updates.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Fiscal Year

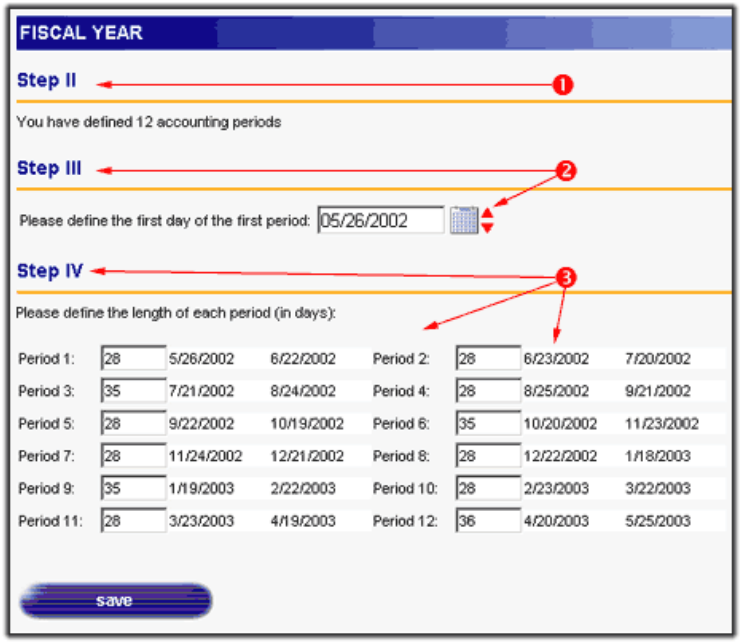

This section of the administration allows you to establish the number and range of periods in your fiscal year.

1) Information at the top of the screen shows when the settings were last changed, and who changed them.
2) Current Saved Settings: Information about your existing periods is shown.
3) If you wish to change this information, select the number of periods you would like in your fiscal year, and click on “Next Step”.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Update Fiscal Year Information

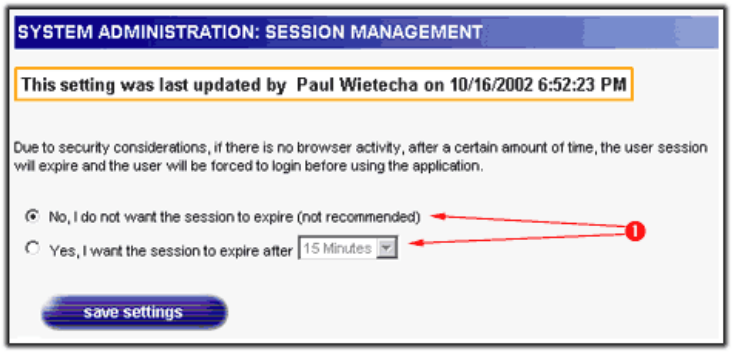

1) Affirms the number of accounting periods you have chosen.
2) Please define the first day of the first period. You can either type in the date or select the calendar icon (in the calendar screen, pull down the correct month and year. The window will close when you click on a day.) You can increment or decrement the selected date by one day by using the red up and down arrows.
3) Please define the length of each period (in days): Enter the number of days in each period. The dates for that period will automatically be calculated and shown to the right of the box. The total number of days you enter needs to equal the number of days in a year.

You must click on the "save" button to make these changes take effect.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Session Management

1) You can choose whether user sessions will log off after an amount of time (which you can specify) or whether you do not wish user sessions to ever be logged off. We strongly suggest that for security reasons, you choose to have sessions expire after an amount of time that your users find convenient.

User Administration:

Page 1: Selecting an Area

If there are no menu items under System Administration, click on the green arrow to the left. The menu items will appear.

Add User: Click on this to add a user to the system.

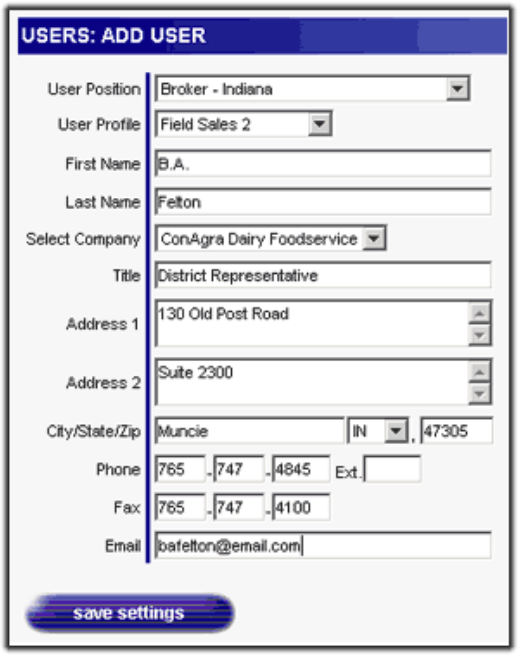

List Users: To see a list of all users in the system, click here.

User Profiles: Manage Programs and Administrative Control Panels for various user groups.

User Positions: Change the names of user positions here.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

Add User

User Position: Select which user position this user should belong to. The positions are in alphabetical order. This is a required field.

User Profile: Select the user profile appropriate for the user you are adding. This is a required field.

First Name: The first name of the user. This field is required.

Last Name: The user's last name. This field is required.

Select Company: Select the company this user is associated with. This is a required field.

Title: Enter the title for the user you are adding. This is a required field.

Address 1: Enter the first part of the users' address. This is a required field.

Address 2: Enter the second part of the user's address. This is not a required field.

City/State/Zip: Enter the city, the state and the zip code for the user you are adding. All three fields are required.

Phone: Enter your phone number, including your area code. The three phone fields are required. The extension is not required.

Fax: Enter your fax number, including area code. These three fields are required.

Email: Enter your email address. This is a required field.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

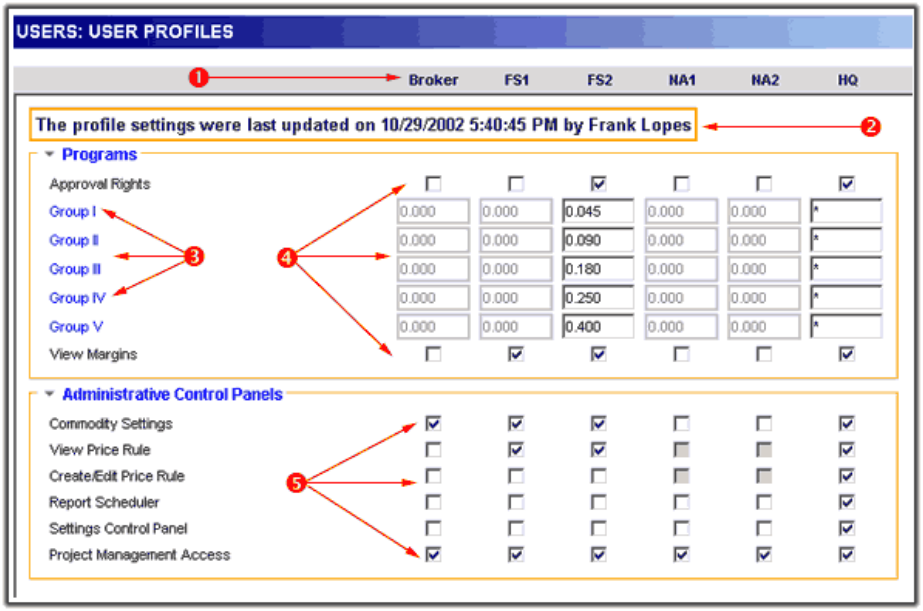

List Users

You can view a list of all users. Clicking on any part of the users profile will bring up a screen like the "Add user" screen with the information for the user already filled in. You can edit the user's information from that screen.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

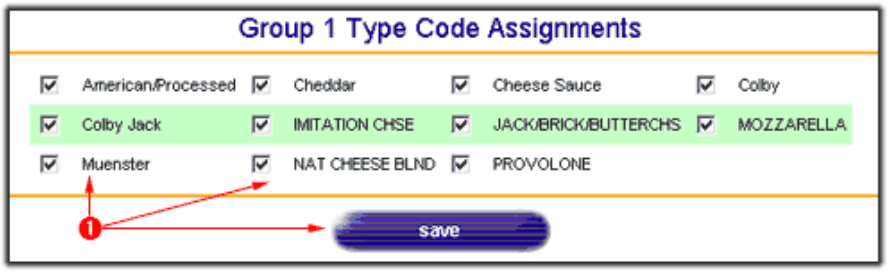

User Profiles

1) The user profiles are displayed across the top bar. The check boxes below the profiles show the settings for the profiles.

2) You can see who last edited this information, and when it was last edited at the yellow header at the top of the screen.

3) Clicking on the Group number to the left opens up a screen which allows you to edit the type code assignments.

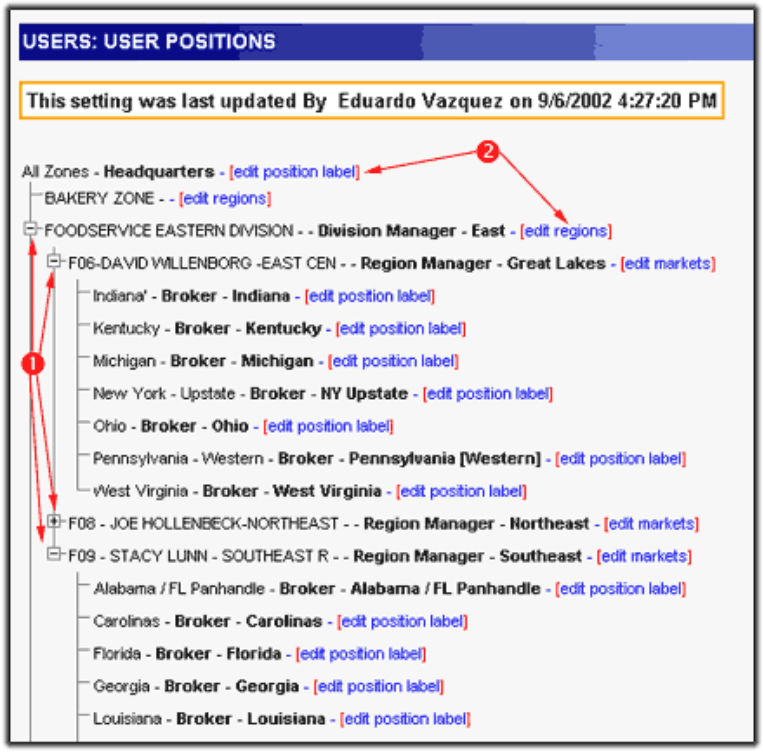

1) Type codes can only belong in one group. If a type code is selected for one group, it is not available for the other groups. For example, here in Group 1, if you were to uncheck "Cheddar", it will now be available to all groups. If Group 5 selects "Cheddar" it will no longer appear as an option for Group 1.

4) You can select whether a profile has approval rights and the right to view margins by click the top and bottom box. If they have approval rights, you can edit information about what margin they need for each group in order to be able to approve a program. For example, if you give an NA1 user approval rights by clicking on the check box, you can then give them permission to approve programs including Group 1 programs if the margin is more than .031, Group 2 programs if the margin is more than .104, Group 3 programs if the margin is more than .012, etc. If you enter an asterisk, there is no upper limit on the margin.

5) Specify which controls you would like profiles to have access to. Unless you give a profile access to commodity information, they cannot view or edit price rules, since price rules are dependent on commodity information.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

User Positions

1) You can expand or contract zones by clicking on the – or + signs. If you click on the – sign the menu will collapse. If you click on the + sign, the menu will expand.

2) You cannot edit position labels unless you are the system administrator. If you are the system administrator, you cannot edit this information.

   If you are an administrator and click on the [edit position label] link you will see the following screen:

   You can change the position label in the box. Then click save.

CONFIDENTIAL: The information contained in this document is not to be copied, shared, or sent to any party other than the recipient without the express written consent of awayX Solutions.

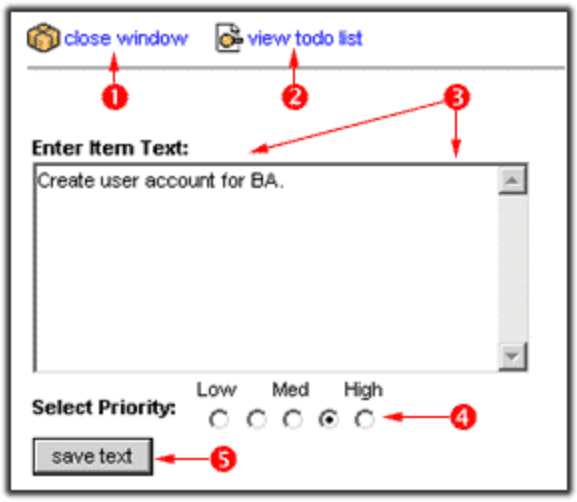

To Do List

1) You can choose to close the window at any time. Click on this link and the window will automatically close itself. You can reopen the To Do List by clicking on the icon in the upper right hand corner of your screen.
2) If you wish to add a new task to your list, click on "add todo".
3) Your list can be emailed to the recipient or recipients of your choice by clicking on the "email list" link.
4) Once you have completed a task, click on the box to the left of the task description. When you check a box, a pop-up alert will appear saying "Click OK to Delete Item". If you choose "OK" the item will be permanently deleted from your list. If you choose "Cancel" the task will not be deleted.
5) The priority of the tasks is shown as a number. Highest priority tasks are marked with a 5, lowest priority tasks are marked with a 1. The list of your tasks is sorted in order of importance, with 5/highest priority tasks at the top and 1/lowest priority tasks at the bottom.
6) You can see the description of the task to the right.

Add New Task

1) You can close the "To Do" window at any time by clicking on the "close window" link. If you have entered a task in the box below and have not saved the text, you will lose the information you have entered when you close the window.
2) Clicking on "view todo list" will take you to your original view screen. As in close window, if you view the todo list without saving the text you have entered, what you entered will be lost.
3) Enter Item Text: Enter the description of the task you would like to add to your list here.
4) You can assign a priority to your task. The default value is Medium. Tasks are ordered by their priority in your list.
5) Once you are satisfied with your entry and the priority you have assigned for it, click on "save text". You will be returned to view your to do list.

Email Your List

You can email your list to as many recipients as you choose. Simply enter the email addresses you wish to send the list to, separated by semi-colons (;). Click on "send email". You will be returned to your to do list.

Xmessenger

1) Connect to User: Once you have selected a user, from the drop down list, click on the "Connect to User" button. You will then be able to send the selected user text messages.

2) To see a list of users currently online, click on the green window at the top, or on the down arrow to the right. You will then see a list of users who are currently online. If your session management settings (part of the administration option) are set so that your session expires after a certain amount of time, you will only see those users whose sessions have been active in that amount of time. For example, if your sessions are set to expire after an hour, you will not see any users who have not been active in the last hour. Highlight the person you wish to talk to and click on their name. Then click "Connect to User". At that point, you will be able to communicate with the user.

3) The text of your incoming and outgoing messages will be displayed in the center area. New messages are displayed at the top, older messages get pushed down. If a message is gray, it indicates that it was part of a prior conversation.

4) Enter your comments in this text area.

5) When you wish to send your comments to the person you are chatting with, click "send message". They will not be able to see your message until you click on "send message".

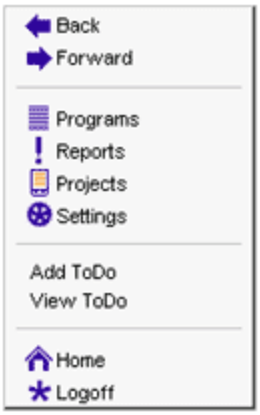

6) After you have finished your conversation, click on the "x" in the upper right hand corner of the Xmessenger to close the window and stop chatting. You will be available to other users if they wish to begin a chat to you even though you have closed Xmessenger.

Right Click Menus

Application-Wide Right Click

When you click the right button of your mouse in the AwayX application, you will see the following list of options appear:

Back: Clicking on the "Back" arrow will take you to the previous page you visited. This is very similar to the "Back" arrow your web browser provides, but it can be used on pages where the web browser options are not available.

Forward: The forward option operates the same way it does on your web browser.

Programs: Clicking on the programs option will take you to the program creation area.

Reports: If you click on the reports option, you will be directed to the report writer.

Projects: If you wish to create a new project, clicking on the "Projects" option will bring you to a new project. From that point you can also search for projects.

Add ToDo: Clicking on "Add ToDo" will bring up a window allowing you to add tasks to your "ToDo" list.

View ToDo: View ToDo will show you the tasks on your list.

Home: If you click on home, you will be taken back to the home page of the application.

Logoff: Clicking Logoff will log out of the system and direct you to the login page.

If you wish to access the regular right click menu, hold down the CTRL key on the left hand side of your screen while clicking on the right mouse button.

Product Specific Right Click

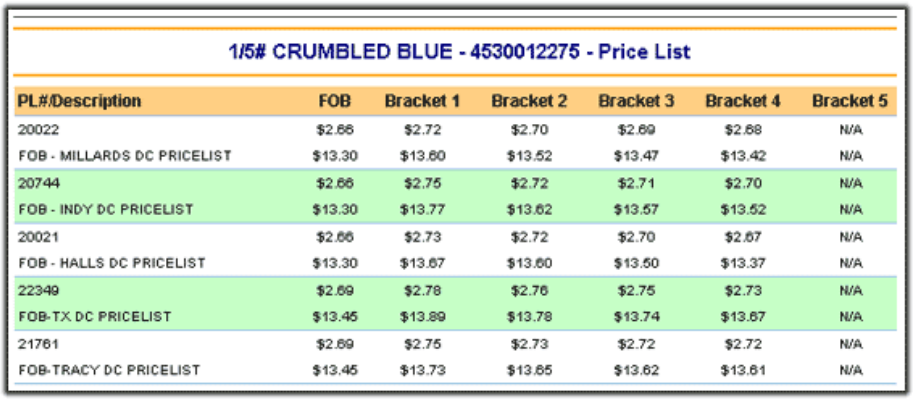

When you are looking at products (in the program scorecard, for example), you may notice a small question mark next to your mouse cursor. This is an indication that more information is available using your right click. If you click on the right mouse button at that point, you will see the following options:

Product Summary: Clicking on the product summary option will open a new screen with the following information:

Price List: Selecting price list option will also open a screen with information about the prices for the product you are hovering over as below:
